GENERAL CENSUSES AND VITAL STATISTICS IN THE AMERICAS

An annotated bibliography of the historical censuses
and current vital statistics of the 21 American
Republics, the American Sections of the British
Commonwealth of Nations, the American
Colonies of Denmark, France, and the
Netherlands, and the American Territories
and Possessions of the United States

Prepared under the supervision of

Chief, Census Library Project

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1943

PREFACE

The development of censuses and vital statistics in recent decades has resulted in a rapid increase in both the variety and the quantity of data published by the governments of the countries of the Americas. At the same time, the expansion of research and administration into the international field has made it essential that private scholars and governmental personnel have ready access to the demographic statistics of all countries. In 1938 a group of population students in the United States began the discussion of possible ways by which collections of the censuses and vital statistics of the world might be completed and made available for research and operational uses. Their deliberations resulted in a plan which was endorsed by the Eighth American Scientific Congress in the following resolution:

WHEREAS: Since the collection in a single depository library of all population, census, and statistical publications throughout the world would be of invaluable assistance to the students of population and national problems in the American Republics,

The Eighth American Scientific Congress

RESOLVED: To endorse through the Inter American Statistical Institute the creation of a special census unit in the Library of Congress of the United States and that it urge the governments of this Western Hemisphere to cooperate in this enterprise.

In accordance with this resolution, a Census Library Project was initiated in the Library of Congress in the fall of 1940 as a cooperative project of the Bureau of the Census and the Library of Congress. The advisory committee to the Library of Congress on the Project consists of the following persons, representing the agencies indicated: Luther H. Evans, Library of Congress; Philip M. Hauser, Bureau of the Census; Stuart A. Rice, Inter American Statistical Institute; Richard O. Lang, American Statistical Association; Frank W. Notestein, Office of Population Research, Princeton University; and Frank Lorimer, Population Association of America.

It became apparent during the early period of the operation of the Census Library Project that the completion of the collections was only one aspect of the problem of making international census and vital statistics materials available to students in the Americas. Consequently, the scope of the Project was expanded to include the following functions: (1) Cooperation in the completion of the collections of the Library of Congress in the fields of census and vital statistics for all countries, (2) the compilation of analytical bibliographies to facilitate the use of the collections, (3) the provision of reference and consultant services in the population field, and (4) the execution of such special studies as should be deemed advisable by the sponsoring agencies.

The exigencies of war necessitated an immediate shift of emphasis from this long-range program to the servicing of the immediate needs of governmental agencies. National censuses constitute the basic source of statistical information on peoples, economies, and cultures, as well as the primary analytical data in such diverse fields as manpower potential, racial heterogeneity, and industrial distribution. Changes in birth and death rates reflect the changing impact of war on the morale, health, and vitality of peoples, while the level of mortality and the specific causes of death reflect health hazards in various parts of the world.

The sudden expansion of the need for information and analysis of these and many other types of problems made questions of the adequacy, availability, and timeliness of census and vital statistics data one of immediate practical concern. A previous publication of the Project, "Recent censuses in European countries, a preliminary list, 1942," indicated that systematic bibliographical coverage was a primary first step in meeting the emergency situation.

It is hoped that the present bibliography relating to the population censuses and current vital statistics of the Americas will be not only an aid in the immediate problems of locating source materials but also a contribution to the development of statistical cooperation and intellectual understanding among the peoples of the Americas. It has been compiled by a limited staff, subject to the continuous pressure of immediate tasks. It is offered as an initial attempt at a comprehensive picture of the official sources of demographic statistics in the Western Hemisphere, not as a definitive study of the resources of any one area. Such definitive studies can be made only in some future period when the leisurely pursuits of scholarship are again possible, and even then, they must be made individually in each country, preferably by students from the country itself. In the meantime, it is hoped that this bibliography of the source materials for all the nations will not only facilitate the use of available statistical data but also stimulate the exchange of information and publications among the various nations. If these results are attained it will represent a step in the development of that demographic center in the Library of Congress which was envisioned in the resolution of the Eighth American Scientific Congress.

This study of the demographic publications of a hemisphere represents the cooperative activity of many persons and agencies. The compilation of check lists of the censuses of the countries of Latin America was started by Jesse H. Shera, the first supervisor of the Project. Responsibility for the arduous task of compilation of sources for the enlarged study was shared by Henry Dubester, Mary M. Kieron, Muriel McKenna, and Margaret Stone, past or present members of the Project staff, and Beatrice Sattler of the Office of Population Research of Princeton University.

Special acknowledgment should be made of the continued encouragement of Luther H. Evans, Chief Assistant Librarian of the Library of Congress; Philip M. Hauser, Assistant Director of the Bureau of the Census; Frank W. Notestein, Director of the Office of Population Research of Princeton University; and Halbert L. Dunn, Chief, Vital Statistics Division of the Bureau of the Census, who was a member of the Committee on the Census Library Project from the time of its inception until recently. The cooperation of many members of the staffs of both the Bureau of the Census and the Library of Congress is also acknowledged, although the staff of the Census Library Project alone should be held responsible for errors, whether of commission or of omission.

IRENE B. TAEUBER,
Chief, Census Library Project.

INTRODUCTION

In 1579, forty years before the Pilgrims landed at Plymouth Rock, Philip II of Spain ordered a survey of the physical, social, and economic resources of all the territories subject to the Crown of Spain. Whether or not this survey constituted the first census in the Americas, or whether it was a census at all, is immaterial. It emphasizes the antiquity of that search for quantitative data which has been so omnipresent a characteristic of the colonies and nations which developed on the new continents. The extent to which the general realization of the need for accurate and detailed information on resources, economy, and people led to the development of national censuses and vital statistics differed widely from country to country, and even from period to period within the same country. The development of demographic statistics in each country has been related intimately to the general social, economic, and political history of the country, and influenced by the vicissitudes of particular events and the presence or absence of outstanding individuals especially interested in the field.

It is only within a recent period that any considerable proportion of the political areas of the Americas have had any permanent census staffs, or even continuing plans for the census taking. In addition, there has been little cooperation or coordination between countries in the time, methods, techniques, or scope of census enumeration and publication. The problem of locating source materials for the study of the population history and the population problems of the various regions of the Americas thus becomes quite difficult. There have been many attempts to grapple with this problem of discovering source materials and making them accessible to the scholars of the various nations. *The Economic Literature of Latin America*, compiled by the staff of Harvard University's Bureau for Economic Research in Latin America, includes a brief résumé of the census history of each of the nations of Latin America.¹ *The Handbook of Latin American Studies*, initiated in 1935 by the Committee on Latin American Studies of the American Council of Learned Societies, includes annotated citations to the demographic publications of the various countries.² Notes on the demography of the countries of Latin America are published regularly in the *Boletín de la Oficina sanitaria panamericana*. In addition, this Bureau issues compilations of the vital statistics of the various countries.³ *Population Index*, the quarterly journal issued by the Office of Population Research of Princeton University and the Population

Association of America, includes citations to the current official and unofficial population literature of the Americas⁴. The report on the *Statistical Activities of the American Nations, 1940*, edited under the auspices of the Temporary Organizing Committee of the Inter American Statistical Institute, includes for each of the cooperating countries a report on statistical activities written by one or more statisticians of the country itself⁵. In addition, the editors presented summary statements for each country on the statistical organization, the national population censuses, the principal government agencies which compile statistics, and the principal official serial statistical publications (latest issue). Finally, the *Inter American Statistical Yearbook, 1942*, prepared under the direction of Raul C. Migone and sponsored by the Argentine Commission of High International Studies, contributed directly to the present bibliography in that it facilitated the process of checking on the completeness of coverage and on the sources available⁶.

The compilation of a systematic bibliography of the official population literature of two continents within a limited time period would have been impossible without heavy reliance on these prior publications. Particularly valuable were the reports on the statistical systems and statistical activities of the various countries published in the *Statistical Activities of the American Nations*. The editorial staff was also peculiarly fortunate in having free access to the master author files of *Population Index*, which are housed in the offices of the Census Library Project.

This report on the *Population Censuses and Current Vital Statistics of the Americas* consists of a separate report for each of the 21 American Republics, Canada, Newfoundland and Labrador, and the colonies and territories of the British Commonwealth of Nations, Denmark, France, the Netherlands, and the United States. Insofar as the nature of the basic data permitted, each report consists of 3 sections: a historical note; a list of all the published national population censuses located, with annotation of the most recent one; and an annotated list of the sources for current vital statistics and population estimates. In many cases, a fourth section was added on other current national population statistics, including especially life tables and statistical atlases and compendia.

Obviously, it was impossible to outline any general *a priori* plan which could be followed to permit uniform and comparable coverage in a bibliography of the publications in countries as diverse as Argentina, Paraguay, French Guiana, Canada, and Greenland. To attempt to achieve complete comparability in the reports for all countries would have been to sacrifice the guiding principle of service and utility for the unattainable goal of uniformity. Actually, the coverage of past censuses is least complete for countries with a long history of census taking and a massive published literature. The official statistical organizations of such countries usually provide check lists of their own publications. It is probable that either they or other individuals or organizations within the country have compiled and published detailed histories and bibliographies of the statistical development and publications of the country.

The policy with reference to the inclusion of provincial census and vital statistics has also differed from country to country. Provincial or city censuses and vital statistics are of unquestioned importance in any country; they become of para-

mount importance only in countries in which there are no current and detailed national censuses or vital statistics. Similarly, there has been no rigid rule on the treatment of censuses other than population censuses when taken separately and not as an integral part of a general national census which included population. In most cases, inclusion has been limited to the most recent census, with no attempt at comprehensive historical guides in such diverse fields as industry, agriculture, manufacturing, distribution, employment, and unemployment.

The problem of what constitutes a census has been an ever-recurring one to which no satisfactory answer has been found. Scientific studies of the validity of population censuses or vital statistics in any particular country necessitate not only formal analysis of the published results for the country as a whole and its various regions, but also knowledge of the process of enumeration and tabulation used in each case, and the particular physical, economic, or political factors influencing the completeness and accuracy of the schedules secured for the various regions and classes. It is probable that such a comprehensive study of validity is the task of the census and vital statistics staffs of the individual countries. Certainly it is not a task to be undertaken with a limited staff for all the countries and colonies of two continents. In any event, the purpose of the present study has not been that of the evaluation of the inclusiveness and quantitative validity of the various censuses, but rather that of offering to research students a guide to the quantitative or partially quantitative data available in the official publications of the various countries. Hence the censuses included in the present compilation are essentially those enumerations or partial enumerations which are accepted as censuses by the statistical bureaus of the various countries. Evaluative comments, where they are included, are based on the comments and analyses included in the published reports of the country itself.

The form and contents of this bibliography reflect one of the primary motives in its compilation—service to the war agencies of the Government of the United States. A careful coverage of the materials in the Library of Congress was followed by searches for missing publications in the Columbus Memorial Library of the Pan American Union, the Army Medical Library, and the libraries of the Pan American Sanitary Bureau, the Department of Commerce, the Bureau of the Census, and the Inter American Statistical Institute. Call numbers are included for Library of Congress holdings, or, for the materials not yet classified, the location within the Library. If publications were located elsewhere in Washington, the name of the library is given.⁷

Bur.*—Library of the Pan American Sanitary Bureau, *Dept. of Comm.*—Department of Commerce Library, *Bur. of Cen.*—Bureau of the Census, *Inter Am. Stat. Inst.*—Inter American Statistical Institute.

Part I

THE AMERICAN REPUBLICS

ARGENTINA

Historical

A long history of legislation and agitation preceded the actual execution of the first national census of Argentina in 1869.¹ A census of all the provinces of the viceroyalty was ordered in 1810, but only that for Buenos Aires was taken, and even these results were not published. In 1813 the constitutional assembly of the Council of the Revolution issued a decree providing for a census, which was to include information on classes, marital status, place of origin, age, and sex. This census was not taken.

The Provisional Regulations of 1815 and 1817, and the Constitutions of 1819 and 1826 stressed the need for a general census of population in order to determine the number and distribution of deputies. The Unitarian Constitution of 1826, Article 12, authorized a census every 8 years, but it was ruled subsequently that this meant a census not oftener than every 8 years. No censuses were taken during this period. The present constitution, that of 1853, provides that the number of deputies be apportioned according to provincial populations.

There have been only three national censuses in Argentina history, those of 1869, 1895, and 1914.² The first census consisted of a simple count of the population. The second included some economic data, while the third and last included economic and agricultural data as well as detailed population tabulations. Entirely aside from any questions of its scope and validity, however, it portrays the Argentina of 1914, not that of 1943.

In 1939 the Chamber of Deputies of the National Congress voted to authorize a census of population in 1940. However, parliamentary proceedings were not completed, so the action of the lower house became only a public recognition of the need for a census.

Apart from the three published censuses of Argentina, annual estimates of the population as of December 31 have been prepared by the *Dirección general de estadística*. The estimates, which are the result of adjusting births, deaths, emigration, and immigration to the latest census count, were published first in 1926, and included the period from 1910 to 1925.³ These and subsequent estimates appear in the reports of the *Dirección general de estadística*. Series D, supplemented since 1931 by annual mimeographed releases.⁴ The method employed in obtaining the estimates is explained in the 1910-25 report.

¹ Comisión nacional del censo. *Tercer censo nacional levantado el 19 de junio de 1914*. Buenos Aires: Talleres gráficos de L. J. Rosso y cía, 1916. Tomo 1, pp. v-vi. Discussion by Alberto B. Martínez, president of the census commission.

³ Dirección general de estadística. *La población y el movimiento demográfico de la República Argentina en el período 1910-1925*. Informe No. 20, Serie D, Demografía, No. 1. Buenos Aires, G. Kraft Ltda., 1926. HA 943 A36

Other reports in this series containing population estimates are: No. 3, 1937-1936, published 1938. No. 4, 1938-1937, published 1939. No. 6, 1939-1938, published 1940. No. 7, 1941-1940, published 1942. HA 945 A5

⁴ Dirección general de estadística. *La población de la República Argentina el 31 de diciembre de 1931*. Buenos Aires, 1932, to date. HA 943.A34

Information concerning the population of Argentina available from the national censuses and official estimates may be supplemented by provincial and city censuses. Typical of such enumerations are the census of the Province of Mendoza, 1942, and the four censuses of the city of Buenos Aires taken in 1887, 1904, 1909, and 1936. There has been considerable agitation for the coordination of the work of the provincial and municipal bureaus, with plans for an annual *résumé* by the *Dirección general de estadística* which would systematize national, provincial, and urban statistics. No such centralization has yet been achieved.

NATIONAL POPULATION CENSUSES

CENSUS OF 1869

RECENT PROVINCIAL CENSUSES

[Official sources indicate that the following censuses have been taken: Federal Capital, Oct. 22, 1936 Province of Buenos Aires, Dec 18, 1938 Province of Mendoza, June 24, 1942 Government of the Chaco, Jan 23, 1934. Government of La Pampa, Oct. 3, 1935 See: Dirección general de estadística. *La población y el movimiento demográfico de la República Argentina en los años 1941 y 1940*. Informe No. 89, Serie D, No. 8 Demografía. Buenos Aires, 1942. 64 pp.]

MENDOZA**Mendoza. Gobernador.**

Mensaje al inaugurarse el periodo ordinario de sesiones de la H. Legislatura. Mendoza, junio de 1942. J 202 M4 N15

The plans for the execution and tabulation of the 1942 census are described, pp. 265-272.

NATIONAL TERRITORIES**Argentina. Dirección general de territorios nacionales.**

Censo de población de los territorios nacionales, República Argentina, 1912. Buenos Aires, Imp. G Kraft, 1914. 370 pp. HA 943.A5 1912

Argentina. Ministerio del interior.

Censo general de los territorios nacionales, República Argentina, 1920. Tomo I. La Pampa, Misiones, Los Andes, Formosa y Chaco. Buenos Aires, Establecimiento gráfico A. de Martino, 1923. 480 pp. HA 943 A4

For each territory this volume includes: *Censos de población, ganadería, agricultura, industrias, comercio, vehículos*. The population census includes distribution, nationality, sex and age, education, population of school age, civil status, vaccination, and occupation.

Volume II, which presumably has the data for the remaining territories, was not located.

SANTA FÉ**Santa Fé. Ministerio de instrucción pública y fomento. Comisión central del censo escolar.**

Cuarto censo general de la población en edad escolar de la Provincia de Santa Fé realizado el 14-X-1937. Santa Fé, 1941. 150 pp. Private Library.

This census includes boys 6 to 14 years of age and girls 6 to 12. Similar censuses were taken in 1912, 1918, and 1925, although there has been no general population census of Santa Fé since 1914. Detailed tables are presented showing by departments and zones the number of children of school age attending and not attending school, by sex and type of residence. Detailed information on the organization and execution of the census is included.

CITY POPULATION CENSUSES**BUENOS AIRES****Buenos Aires. Comisión técnica encargada de realizar de cuarto censo general.**

Cuarto censo general, 1936. Población. 22-X-1936. Buenos Aires, Talleres gráficos de Guillermo Kraft, 1938-1940. 4 vol. HA 959.B94 1936

Tomo I. Informe preliminar 1938. 430 pp.

Tomo II. Masculinidad. Lugar de nacimiento. Alfabetismo. 1939 463 pp.

Tomo III. Estado civil. País de matrimonio Religión. 1939 413 pp.

Tomo IV. Fecundidad, familias. 1940 393 pp.

Vol. I contains a general introduction to the population census, and a description of the plans, techniques, forms and procedures of this census. It also presents tables and graphs on de facto and de jure populations by age, sex, and place of origin, with comparative data from the census of 1914. Vol. II includes tables and graphs on age composition, origin, sex ratios, place of birth by age and sex, and literacy by age. Vol. III includes de jure population by age, marital status

and origin; marital status by place of birth, religion by place of origin, age, sex, and literacy Vol IV contains tables and graphs on fertility and the family

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Centro de estudiantes y colegio de graduados.

"Reseña de la vida económica Argentina durante el año 1940" *Revista de ciencias económicas* 29 (Serie II, 239), 210-226 Suplemento extraordinario, June 1941 HB9 R37

The section devoted to population and labor covers vital statistics, population increase, and migration, 1935-1940 Issued annually

Departamento nacional de higiene. Sección demografía y geografía médica.

Anuario demográfico del año 1936. Natalidad, nupcialidad y mortalidad Año X. Buenos Aires, 1940 143 pp HA 943 A32

Births are tabulated by months, legitimacy status, and nationality, marriages by months, age, nationality and marital status, deaths by months, occupation, nationality, and cause of death by months, region, and age The data for each province and territory include deaths by cause.

Publication irregular

Dirección general de estadística.

Clasificación estadística de las causas de las defunciones Nomenclatura internacional de 1938. Informe No 77, Serie D, No 5, Demografía Buenos Aires, 1940 38 pp HA 943 A36

El comercio exterior Argentino en 1941 y 1940 y estadísticas económicas retrospectivas. Boletín No 229 Buenos Aires, 1942. 273 pp HF 159 A5

The section, "Demografía," summarizes data from the national censuses of 1869, 1895, and 1914, and the territorial censuses of 1895, 1905, 1912, 1914, and 1920 Annual population estimates are presented, 1914 through 1941 National vital statistics are summarized for the period from 1910 through 1941, provincial vital statistics for the period from 1931 through 1941. Migration statistics are summarized, 1857-1941

Even-numbered volumes, covering the first half of a year, contain only commercial data Odd-numbered volumes are yearly summaries and include a demographic section.

La población de la República Argentina el 31 de diciembre de 1941. Cifras provisionales Buenos Aires, 1942 18 pp HA 943.A34

This annual release presents estimated population of provinces, migration, and vital statistics.

La población y el movimiento demográfico de la República Argentina en los años 1941 y 1940. Informe No 89, Serie D, No 8 Demografía Buenos Aires, 1942. 64 pp. HA 943.A36

Chapter I gives estimates of the population by provinces up to Dec 31, 1941 Chapter II presents vital statistics for 1941. Chapter III gives detailed tables on births, deaths, marriages, and infant mortality, with breaks for age, sex, legitimacy status

Issued annually.

CURRENT PROVINCIAL VITAL STATISTICS

(Including Population Estimates)

. BUENOS AIRES

Buenos Aires. Dirección general de estadística.*Anuario estadístico* Año 1936 La Plata, Taller de impresiones oficiales, 1937 224 pp HA 958 B915

The section, "Demografía," pp 11-48, contains vital statistics and population estimates by minor divisions as of Jan 1, 1937.

The 1938 issue appears to be the last one available in Washington There is no information on further publication

Boletín de la Dirección general de estadística de la Provincia de Buenos Aires 33 (255) 1091-1179 Jan, 1932. La Plata, Talleres de impresiones oficiales, 1932 HA 958 B85

This issue presents vital statistics for the last part of 1931.

CÓRDOBA

Córdoba. Dirección general de estadística.*Anuario estadístico* Año 1938 Córdoba, Talleres gráficos de la penitenciaría, 1942. 444 pp HA 958 C8

Estimated populations and detailed vital statistics for 1938 are presented, pp 236-362

ENTRE RÍOS

Entre Ríos. Dirección general de estadística.*Síntesis estadística, año 1932* Parana, Imprenta de la provincia, 1933 HA 958 E6A3

The population section, pp 4-17, gives estimated population and vital statistics No later issues were located

LA RIOJA

La Rioja.For a summary statement on population, see Sanches Melchor B, *La Provincia de La Rioja, estudio físico, político y económico* Buenos Aires, Talleres gráficos Argentinos L J. Rosso, 1928. 246 pp. F 2956 S19

MENDOZA

Mendoza. Dirección general de estadística.*Anuario de la Dirección general de estadística de la Provincia de Mendoza . . . correspondiente al año 1936* Mendoza, Imprenta oficial, 1937 282 pp HA 958 M4A3

The section, "Extensión y población," gives population estimates and some data on aliens The section on immigration summarizes trends, 1890-1936, and gives data on distribution, nationality and occupation for 1936 The section, "Demografía," summarizes vital rates for 1898-1936, analyzes trends in more detail for 1927-1936, and presents detailed data for 1936.

The 1936 *Anuario*, the last located, is in the Library of the Pan American Union**Mendoza. Instituto técnico de investigaciones y orientación económica de la producción.***Estimación y análisis de la población de la Argentina con particular referencia a la de Mendoza.* Economía y finanzas, Mendoza, Informe No. 2 Feb, 1940.

Govt. Publ. R. R.

Includes data for the Chaco, La Pampa, Misiones and Formosa.

Tendencias demográficas de Mendoza Natalidad, mortalidad, nupcialidad y población extranjera de 1914 a 1940. Informe . . . No. 3. Mendoza, 1940 31 pp. Govt. Publ R R.

NATIONAL TERRITORIES

Argentina. Dirección general de estadística.*El movimiento demográfico en los territorios nacionales de la República Argentina en los años 1933 a 1941.* Informe No. 91, Serie D, No. 9. Demografía. Buenos Aires, 1942. 162 pp. HA 943 A36

The National Territories include the Chaco, Chobut, Formosa, La Pampa, Los Andes, Misiones, Neuquén, Río Negro, Santa Cruz, and Tierra del Fuego. Ch I gives a general discussion of the method of obtaining the statistics. Ch. II presents summary data, 1933-1941. Ch. III is an analysis of the data for 1941. Ch. IV presents detailed vital statistics for each territory, 1941. Ch. V gives summary tables for territories, by months, 1941. Ch. VI contains summary tables by Civil Registers in each territory, 1941. Ch. VII summarizes data for the period 1933-1941 for each territory.

SALTA

Salta. Dirección general de estadística.

Boletín de estadística de la Provincia de Salta, año 1926. Salta, Imprenta oficial, 1927. HA 958 S2A3

Population estimates and vital statistics are included. No later issues were located.

SAN LUIS

San Luis.

For a summary statement on population, see Gez, Juan E., *Geografía de la Provincia de San Luis*. Buenos Aires, Jacobo Peuser, Ltda., 1938-1939. 3 vol. F 2966 G364

"La población," Vol. II, Ch. IV, pp. 387-557, presents population and vital statistics data, primarily for the period 1931-1936. There are tables from the *Censo escolar nacional de 1931* which had not been published previously.

SANTA FÉ

Santa Fé. Dirección general de estadística.

Estadística demográfica, meses de enero a julio de 1934, comparados con datos de los años 1930-1933. Año 4, No. 8. Santa Fé, Casa de gobierno. 1935. 49 pp. HA 958 S8A45

No later issues were located.

Nacimientos, matrimonios y defunciones registrados durante los diez primeros meses del año 1930. Informe elevado al Ministerio de instrucción pública y fomento con fecha enero 20 de 1931. Año 1, No. 2. Santa Fé, Imp. de la provincia, 1932. 21 pp. HA 958.S84

SANTIAGO DEL ESTERO

Santiago del Estero. Dirección general de estadística, registro civil y trabajo.

Compendio estadística numérica de la Provincia de Santiago del Estero, 19-.

HA 958 S86 A32

TUCUMAN

Tucuman. Oficina de estadística.

Anuario de estadística de la Provincia de Tucuman, correspondiente al año 1931. Tucuman, Impr. M. Violetto y cía., 1933. 494 pp. HA 958.T9A2 1931

The section, "Demografía," pp. 17-65, includes data on vital statistics, immigration and population estimates.

The 1934 issue is in the library of the Pan American Union. No later issue was located.

CURRENT CITY VITAL STATISTICS

(Including Population Estimates)

BUENOS AIRES

Buenos Aires. Dirección general de estadística municipal.

"Cálculo de la población funcional de la ciudad de Buenos Aires en el período 1536-1939." *Revista estadística municipal*, ciudad de Buenos Aires 52(622-624): 211-214. July-Sept., 1939. Govt. Publ. R. R.

Demografía. *Revista de estadística municipal de la ciudad de Buenos Aires*, 54(649-651): 327-371. Oct-Dec., 1941. Govt. Publ. R. R.

A résumé of vital statistics for 1941, total and for minor areas, is followed by detailed tables on births, marriages, deaths, deaths by cause, and migration.

LA PLATA

La Plata.

Boletín de la Municipalidad de La Plata 33(290); 69 Jan-June, 1941. Govt Publ R R
Summary vital statistics are presented semiannually.

ROSARIO

Rosario. Dirección general de estadística.

Anuario estadístico, 1940. Rosario, Emilio Fenner, S R I., 1942 148 pp. HA 959 R7

Part IV. Population of Rosario, 1859-1940. Part V, Vital statistics.

Boletín estadística de la ciudad de Rosario Vol 12, 1938 HA 958 R714

The first section of this quarterly publication gives detailed vital statistics for the city. The issue for Sept., 1941, is in the Pan American Union Library.

SANTA FÉ

Santa Fé. Dirección de estadística municipal.

Anuario estadístico de la ciudad de Santa Fé. Año 1938, volume xxx. Santa Fé, Talleres gráficos Castellri Hermanos, 1940 xlvii, 205 pp HA 959 S28

Section II, "Demografía," contains detailed vital statistics for 1938, with summary data for 1914-1938.

"Demografía" *Boletín de estadística municipal de la ciudad de Santa Fé* 41(162); 2-12. Jan-March, 1942. HA 959 S3

Vital statistics are presented quarterly.

OTHER CURRENT NATIONAL POPULATION STATISTICS

Comas, Jorge M., and Goldenberg, Pedro.

Tabla de mortalidad de la República Argentina construida con los datos del 3er. censo nacional Monografías de los alumnos del Instituto de biometría, No 3. Facultad de ciencias económicas de la Universidad nacional de Buenos Aires, 1936. 14 pp, 7 tables, 9 graphs HA 13. B8 No. 3

Comité nacional de geografía.

Anuario geográfico argentino. Buenos Aires, 1941. 651 pp. Govt Publ. R. R.

Ch. V, "Población," pp 156-195, summarizes early estimates of population and the data of the censuses of 1869, 1895, and 1914, together with official estimates for Dec., 1939 (These provincial estimates are made by adding natural increase to the 1914 census population, assuming that migratory changes occur according to the observed coefficient of attraction between the censuses of 1895 and 1914) The increase of total population is traced from 1797 to 1939 Summary data are also presented on age, 1869, 1895, 1914, and 1939 (estimated by Alejandro E. Bunge); religion, language; urban population, including Buenos Aires, 1536-1939; vital statistics, Federal Capital and provinces, 1910-1940, vital statistics of principal cities; historical and recent international migration by periods; demographic, economic, and nationality characteristics of migrants, and colonization.

BOLIVIA

Historical

Bolivia has had a long history of population censuses, although none appear to have been published in full except the last, that of 1900. A general census of the Provinces of Upper Peru was taken in 1796.¹ Population counts based on censuses taken in 1831, 1835, and 1846 are given in the first official publication of Bolivian population statistics, José María Dalencé's *Bosquejo estadístico de Bolivia*.² Population figures from censuses taken in 1831, 1835, 1845, 1854, and 1882 are reproduced in the first volume of the report of the Census of 1900.³ According to the recent publications of the Bolivian Statistical Department, none of these censuses were complete or accurate enough to constitute a valid basis for population estimates.

The only census published in full for the entire country is that taken under the direction of the *Oficina nacional de inmigración, estadística y propaganda geográfica* in 1900. Lack of census experience, combined with difficulties of transportation and communication, resulted in incomplete returns for the enumerated areas. In addition, no attempt was made to cover the regions populated by uncivilized tribes. This population was estimated at 91,000 and added to the census population of 1,675,451.⁴ Official population estimates from 1900 to the present have been made by taking this admittedly defective census as the base, and assuming a fairly fixed geometric rate of increase. From 1900 to 1933, the rate of increase for each province, and hence for the country as a whole, was assumed to be 1.75 percent per year. From 1933 to 1935, this rate was reduced to 1.0 percent per year because of the population losses of the Chaco War.

The *Dirección general de estadística* began to plan for a new census in 1938, but various factors operated to prevent its realization.

There have been no provincial censuses which might partially compensate for the lack of a recent national census. However, there have been at least two censuses of La Paz, one in 1909⁵ and another in 1942.⁶ Preliminary reports of the 1942 census indicate a population of 301,450, including 12,531 aliens and a floating population estimated at 14,353.⁶

⁵ Comisión central del censo. *Censo municipal de la ciudad de La Paz, 15 de junio de 1909*. . . La Paz, Tall tip lit. de José Miguel Gamarra, 1910. xii, 80, ix pp. This report of the 1909 census includes figures from city or national censuses taken in 1675, 1796, 1831, 1845, 1886, and 1902, but no detailed information is given as to the nature of these early so-called municipal censuses.

⁶ Unpublished data furnished by the *Dirección general de estadística, Sección demográfica*.

Vital statistics have been fully as inadequate as census materials. This inadequacy is admitted freely by the officials of the Bolivian Statistical Bureau, who attribute it primarily to the absence of a system of civil registration.⁷ The last *Demografía* available, that for 1940, expresses the hope that the newly established Civil Register will permit the vital statistics for 1941 to be approximately 90 percent complete.⁸

Historically, statistics on the number of births have been based on the records of the churches. The statistics on the number of deaths have been based on the records of burial permits issued. The result is that vital statistics were not sufficiently complete to furnish a basis for estimating populations. Neither did they furnish a measure of the level of either fertility or mortality. In the introduction to the *Demografía*, 1939, it is pointed out that the birth rate for Bolivia, computed on the basis of the 1939 estimates, is 15.9, as compared with 34.5 for Chile, 23 for Argentina, 36 for Ecuador, 38.6 for Mexico, and 19.7 for Uruguay.⁹ Internal analysis of the vital statistics corroborates the *a priori* assumption that the reported rate of 15.9 does not represent the level of fertility in Bolivia.¹⁰

BRAZIL

Historical

The Abbé Correa da Serra made an estimate of the population of Brazil in 1776 on the basis of the data of the ecclesiastical registers. The only other known count of the population during the colonial period is that made by the Department of War in 1808¹. Another attempt at a count was made in 1818, but estimates of the size of the population of Brazil in the first half of the nineteenth century continued to be conjectural estimates. A census was planned for 1851, but a multiplicity of factors prevented its realization. Official estimates were made in 1854 and 1867 on the basis of inquiries made by the presidents of the provinces. Decrees of 1870 and 1871 provided for the execution of a census of the Empire and a general statistical bureau was created. The Imperial census of 1872 constitutes the first approach to an actual enumeration of the population. This census, published in 23 volumes, presented detailed information not only on the distribution of the population but also on age, sex, nationality, marital status, color, and free or slave status.

Five national censuses have been taken during the history of the Republic, in 1872, 1890, 1900, 1920, and 1940. A census was planned for 1880, but the deterioration of the imperial statistical organization prevented its realization. The census of 1890 was taken under extraordinarily difficult circumstances; slavery had been abolished only 2 years before, and the federated Republic had replaced the Empire the previous year. The results of the census of 1900 were regarded as quite inaccurate at the time; those for the Federal District were not accepted, and a new census was taken in 1906. Data for the remainder of Brazil were examined and corrected for underenumeration and failure to enumerate, after which an estimate of the population of the states and municipalities was published. Political instability was responsible for the postponement and eventual cancellation of the census of 1910. Thus in 1920 Brazil had few reliable statistics which were not almost 50 years old. The comprehensive census of that year covered population, industry, and agriculture. However, there was considerable evidence that it represented a great overenumeration of the total population, and especially for that of certain areas. It remained the necessary base for the computation of vital rates and the analysis of Brazilian population problems for 20 years, since the outbreak of revolution necessitated the cancellation of the census planned for 1930.

The Brazilian Institute of Geography and Statistics, a cooperative association of the various State statistical departments, was organized in 1934 to coordinate the statistical services of the States and to determine standards and improve techniques for the reporting and analysis of social, economic, financial, and agricultural statistics. This agency was responsible for the preparation and execution of the census of 1940.

For a more detailed history of the early estimates and censuses, see: "Resumo histórico dos inqueritos censitários realizados no Brasil." Pp. 403-482 in: Diretoria geral de estatística. *Censo do Brasil realizado em 1 de setembro de 1920*. Vol. 1. *Introdução*.

HA 971.A2 1920

Also: Teixeira de Freitas, M. A. "As atividades estatísticas do Brasil." Pp. 71-112 in: Inter American Statistical Institute, *op. cit.*

Both a family and an individual schedule were used in the census of 1940. The individual schedule included 45 questions, covering name, sex, age, marital status, place of birth, education, employment status, and chronic infirmities.² Fertility questions included number of children ever born, number living, age of parents at birth of the first child, and number of children living at home. The question on color had as its purpose the determination of the components of Brazilian racial intermixture. Nativity questions included the place of birth of the individual and his parents, the date of entry into Brazil, the ability to speak Portuguese, and mother tongue. There were various questions on education. Occupational information included principal or current occupation and secondary occupation, and whether or not exercised for remuneration. The economic census consisted of five parts: agriculture, industry, commerce, transportation and communication, and services. The social census covered institutions and establishments serving various social needs.

Preliminary data only are available from this census. A volume has been issued, based on hand counts, giving the population of municipalities, and including a map of the distribution of the population.³ However, the careful planning and administration of this census by the Institute of Geography and Statistics give promise of detailed analytical tabulations never before available for Brazil.

Vital statistics for the country, its regions, States, and principal cities are published in the *Anuário Brasileiro* of the *Instituto brasileiro de geografia e estatística*. The contents of the 1938 issue were republished, with additions, as a series of individual State yearbooks under the title, *Sinopse estatístico do estado*. The *Boletim mensal do Serviço federal de bio-estatística* publishes current vital statistics for States. Monthly vital statistics for the city of Rio de Janeiro are often included in the *Revista brasileira de estatística*. In addition, the *Resumo da bio-estatística de cidades brasileiras*, issued biweekly, gives uncorrected vital statistics for a group of Brazilian cities, based on the civil register.

Decrees and laws establishing and implementing the Brazilian Institute of Geography and Statistics.

Instituto Brasileiro de geografia e estatística.

Divisão territorial dos Estados Unidos do Brasil Quadro territorial—administrativo e judiciário—das unidades de Federação, fixado para o quinquênio de 1939-1943, em virtude de lei orgânica nacional no 311, de 2 de março de 1938. Rio de Janeiro, Serviço gráfico do Instituto Brasileira de geografia e estatística, 1940. 451 pp.

Inter Am. Stat. Inst.

The first part consists of two tables for each of the Brazilian states Table 1 gives the names of the judicial, administrative, and joint administrative-judicial areas, respectively. Table 2 lists districts which through recent laws have changes in area or classification, with a description of the change.

The second part consists of two sections Section I lists changes in place names. Section II lists cities and towns of circumscribed area, giving the political unit to which they pertain

The Appendix (pp 365-451) cites the laws authorizing the changes.

CHILE

Historical

There were three enumerations of the population of Chile in the eighteenth century. A nation-wide census was ordered in 1811, but only the Province of Concepción actually completed its enumeration. A general census was attempted in 1813-14, but the few surviving fragments are insufficient for any evaluation of its extent or validity. The first national census was taken in 1831 and 1835. Counts were made of the population in Maule, Concepción, Valdivia, Chiloé, and Santiago in 1831, while the remaining provinces were covered in the year 1835.¹ A second census, taken in 1843, was completed within a year. The accuracy of both the 1831-35 and 1843 counts is quite questionable, since techniques were simple and the population widely dispersed and uncooperative.² No publications of either census have been located.

In 1853 a law was passed providing for the taking of a census in the following year and at 10-year intervals thereafter. The census authorized for 1854 was actually taken, and the results published in some detail by the *Oficina central de estadística* in 1858. Subsequent censuses were taken in 1865, 1875, 1885, 1895, 1907, 1920, 1930, and 1940. The final volumes of the 1940 census are not yet available, although preliminary results have been published in *Estadística Chilena*, the monthly bulletin of the *Dirección general de estadística*.

Vital statistics have been recorded in Chile since 1848, although a civil registration system was not established until 1885.³ A centralized card reporting system has been used since 1912, current vital statistics are now published in the monthly bulletin, *Estadística Chilena*. The December issue released in March of the following year, contains a yearly summary. Current population and vital statistics are also made available in the *Anuario estadístico de Chile*. This publication consists of seven volumes, the first, *Demografía y asistencia social*, contains about 100 pages of population statistics.

OTHER NATIONAL CENSUSES

AGRICULTURE, 1929-1930

Dirección general de estadística.

Censo agropecuario, 1929-1930. Santiago, 1938 1 vol. Pan Am. Union
Detailed information on acreage, yield, livestock, and so forth, does not include information on agricultural labor force.

EDUCATION, 1933

Dirección general de estadística.

Censo de educación. Año 1933. Santiago, Imp. Universo, 1934. 84 pp.
L 301.B5 1933

Includes age of students and marital status and training of teachers for all types of schools.

INDUSTRY AND COMMERCE, 1928, 1937

Dirección general de estadística.

Censo de la industria manufacturera y del comercio de 1928 Santiago, Imprenta Universo, 1929. 119 pp. HA 191 A45 1928

There are two sections: A "Industria manufacturera." and B. "Comercio interior." Both include nationality of proprietors and classification of personnel by type of employment (by month or day), sex, locality, and industry

Censo industrial y comercial, año 1937. Santiago, Imprenta y litografía Universo s a, 1939. 241 pp. HC 191 A45 1937

Information is similar to that in the census of 1928, including nationality of proprietors and classification of personnel by type of employment (by month or day), sex, locality, and industry.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Estadística Chilena. Santiago, Imprenta y litografía Universo s. a. Vol. 15, No. 1-2. Jan-Feb, 1942. HA 993 A3

The section, "Demografía," regularly includes the following data. Marriages; live births and stillbirths by legitimacy status and sex; deaths by age and sex, by provinces and cities, and deaths by cause. The December issue of each year summarizes vital statistics for the year. Annual marriage, birth and death rates for 1918 to 1941 were included in the issue for Dec., 1941.

Estadística anual. Volumen I: Demografía y asistencia social. Santiago, Soc. imprenta y litografía Universo, 1940. HA 991.B2

Vital statistics for 1939 are presented in greater detail than in the monthly *Estadística Chilena*. Age, sex, occupation, nationality, and other classifications are used, including geographical break-down by zones

Servicio nacional de salubridad.

Anexo estadístico a la memoria de Servicio nacional de salubridad correspondiente al año 1939 Santiago, 1941 113 pp Govt Publ. R. R.

Tables 32-97 give vital statistics for 1939, with comparative data for the period 1932-1939. The final section, pp. 93-113, consists of 105 graphs of population and vital statistics for various periods through 1939. Morbidity and mortality for specific diseases are included

Ministerio de salubridad, previsión y asistencia social. Departamento de previsión social.

La seguridad social, por el Dr. Julio Bustos A., jefe del departamento de previsión social del Ministerio de salubridad, previsión y asistencia social. Estudio de la previsión social en Chile, sus resultados después de diez años de aplicación y las reformas que deben introducirse. Trabajo efectuado con la colaboración del personal del Departamento de previsión social. Santiago, 1936. 266 pp

HD 7156 A4 1936

The introductory section contains general mortality statistics for Chile, and an analysis of the relative importance of the different causes of death.

Ministerio de salubridad.

La realidad médico-social Chilena. Síntesis. Santiago, Imprenta Lathrop, 1939. 216 pp RA 465 A52 1939

Part I, "Algunos antecedentes geográficos y demográficos," summarizes trends in population increase, age composition, fertility and mortality for various periods through 1938, in some cases from 1848. Part II, "Condiciones de vida de las clases trabajadoras," is concerned with economic conditions and the analysis of mortality for specific diseases in the light of those conditions.

OTHER CURRENT OFFICIAL POPULATION STATISTICS

Dirección general de estadística.

Síntesis geográfico-estadística de la República de Chile. 1933. Santiago, 1933. 1 vol. HA 992.A33

Population data for the census years from 1854 through 1930, and vital statistics from 1848 through 1932 are included.

Madrones Restat, Jorge.

Sobre el cálculo de la duración media de la vida en Chile. Santiago, Impreso en los talleres gráficos de la editorial "Cultura", 1940. 10 pp. (From: Boletín de salubridad) Pan Am. Union

1930 census data and vital rates for 1848-1930 are the basis for the calculations.

COLOMBIA

Historical ¹

The Colombian Constitution of 1821 decreed that representation of the individual districts of the country should be according to population. A series of censuses was taken under this authorization, in 1825 for Greater Colombia, and in 1835, 1843, and 1851 for Nueva Granada. These censuses were taken by enumerators in the districts, who compiled the returns and sent only summaries to the central government. Many factors influenced the accuracy of this census. The use of the results for determining representation tended to maximize returns, while the usual fears of taxes and military service led to under-enumeration.

A census law of 1858 transferred the function of census taking to the Federal States, under an administrative system which tended to produce a series of individual State censuses rather than a Federal census. This defect is particularly apparent in the census of 1864, which was published only as a count of the number of inhabitants. Data on age and occupational composition were published for the first time in the census of 1870, which was the last general census before the civil war. The new census law of 1904 provided that censuses were to be taken by the municipalities, but this method proved unsatisfactory. The census of 1912 was taken according to the European tradition, each individual filling out his own census questionnaire.

The census of 1918 was also conducted by the distribution of individual questionnaires and counting by individual districts. It included age distributions by quinquennial groups, as well as information on education and occupations. A census of 1928 was carried out by the *Contaduría general*, but it was so incomplete that the Congress refused to accept it.

In preparation for the 1938 census, a *Dirección general de los censos* was set up independently of the political administration. Careful plans were made for the organization and execution of the census. A census of housing, later published in 1939, was carried out on April 20, 1938, preliminary to the total census. The questionnaire of the main census covered name, position of the head of the family, sex, age, marital status, degree of education, nationality, occupation, religion, and physical and mental defects.

Vital statistics have a long history in Colombia, but they remain incomplete. The ecclesiastical register recorded the marriages, baptisms, and funerals of Catholics. A civil registration office was set up in 1873, but was not used completely. A law of 1914 provided for a third statistical register of marriages, births, and deaths, but deaths alone tended to be recorded because of the legal requirement of burial permits. The national reports of the *Contaduría general* have been based on combinations of information from these various sources. A law of 1938, providing for a compulsory system of civil registration, offers possibilities for the development of more adequate vital statistics.

Instructions to enumerators, with data on and organization charts of the 1938 census.

Informe que la Contraloría general de la República rende al Sr. Ministro de Gobierno y a las honorables Cámaras sobre el levantamiento del censo civil de 1938. *Anales de economía y estadística* 2 (4): 3-45. Aug., 1939. Govt. Publ. R. R.

There is a general introductory statement on the organization and results of the civil census of 1938. Part I, Antecedents, gives a brief history of the census in Colombia and of the preparations for this census. Part II, Legal basis, reproduces the various decrees. Part III, Technical basis, lists the data requested and defines terms. Part IV, General organization, discusses costs and describes the organization of the census. Part V, Results, summarizes basic data on trends and distribution.

Censo general de la población, 5 de julio de 1938. Ordenado por la ley, 67 de 1917. Bogotá, Imprenta nacional, 1940-1942 HA 1012 A3 1938

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Anuario general de estadística. 1940. Bogotá, Imprenta nacional, 1941.

HA 1011.A16

Vital statistics include marriages by age and marital status for departments and by nationality, births, 1931-1940, by legitimacy status, by nationality of parents and of mothers, deaths, 1931-40; deaths in 1940 by age, sex, and civil status; infant mortality by sex, and legitimacy status.

Migration statistics for 1935-1940 include information on sex, marital status, occupation and nationality. Population estimates are also included.

Estadísticas, demográfica y nosológica, 1938 Publicación dirigida por Miguel Angel Escobar, director de la Sección de demografía de la Dirección nacional de estadística. Editada por cuenta del Ministerio de trabajo higiene y previsión social. Bogotá, Imprenta nacional, 1938. 63 pp. HA 1012.A4 1936

Vital statistics include marriages by marital status, age and nationality; births for departments and by nationality of parents; deaths by month, for departments, and by age, according to presence of medical assistance. Detailed statistics on the causes of death are presented.

Síntesis estadística de Colombia, 1941. Bogotá, Imprenta nacional, 1942. 155 pp. Govt. Publ. R. R.

The population section, pp 22-33, includes a résumé of population growth, 1770-1938, summary data from the 1938 census, and estimated populations as of Dec. 31, 1941. Vital statistics are given for 1938-1941 inclusive. Data on net migratory change cover the years 1939, 1940, and 1941.

OTHER CURRENT NATIONAL POPULATION STATISTICS

Dirección general de estadística.

Estudio histórico analítico de la población colombiana en 170 años. Juan de D. Higueta. Anales de economía y estadística. Suplemento al número 2º, Tomo III. April 25, 1940. Bogotá, 1940. 113 pp. HA 3567.N5

This study, made under the auspices of the Director of Statistics, covers the census history of Colombia in four periods: colonial period to independence,

about 1825, the national republic, to 1870, the period of civil strife to 1905, and the thirty years of peace, 1905 to the present. The first part of the study characterizes the political and social life of these four periods and examines critically the censuses taken, including that of 1938. The second part is a mathematical analysis of population increase, with special emphasis on the validity of the logistic law of population growth. Population is projected to 1948.

"La tabla de mortalidad en Colombia." *Anales de economía y estadística* 6 (3) II Feb., 1943. HA 3567 N5

The *Dirección nacional de estadística* announces that a life table for Colombia is to be published in the *Anales* in the near future. This table, the first official life table for the nation, was prepared by Jorge Rodríguez.

Sociedad colombiana de demografía.

La demografía colombiana. Año 1, Número 1. Jan., 1936. 53 pp.

HB 881 A1 D5

Contents: Statutes of the Colombian Society of Demography, biometrics, the census of population, the population of Colombia, vital statistics in the Department of Bolívar, vital statistics in Bogotá, infant mortality in Bogotá, social statistics; and the Law of 1935 on the civil census of the Dominican Republic.

This publication was issued under the auspices of the *Sección de estadística, Contraloría general de la República*. Vol. 1, No. 1 appears to have been the only issue.

COSTA RICA

Historical

Many estimates of the size and racial composition of the population of Costa Rica have been made since the first Spanish contact with the area in 1502. Some of these were official estimates, based on special surveys or parish registers, while others were made by individuals or ecclesiastical institutions. B. A. Thiel, in his *Monografía de la población de Costa Rica en el siglo XIX*, traces the growth of the population from 1564 to 1801 on the basis of old parish records, the reports of various governors, and an informal census of 1771-78.¹

Various reports on the population of Costa Rica cite data reputedly based on censuses in the years 1824, 1836, 1844, 1864, 1883, 1888, 1892, and 1927.² The present statistical office in Costa Rica admits only four of these as national censuses, those of 1844, 1864, 1892, and 1927. The status of the 1844 data is questionable; it appears to represent a compilation of data from parish registers. The report on the census of 1892 contains references to a census of 1883, but the *Departamento de biodemografía* was unable to locate it.³ It appears probable that the information published for the other years consists of estimates of varying degrees of validity. For instance, in 1888 the *Dirección general de estadística* published a report entitled *Población de la República de Costa Rica el 31 de diciembre de 1888*. The only indication as to the source for the statistics presented is a footnote to one table explaining the difference between one provincial population and that given for the same province the preceding year in the *Anuario* as due to a revision of the vital statistics balance.⁴

The scattered distribution of the population, combined with a widespread lack of cooperation, impaired the value of the census of 1864.⁵ The official estimate of the extent of underenumeration in the census of 1892 was 12 percent.⁶ The last national census was taken in 1927. The results were published in three volumes, the first devoted to vital statistics, the second to the total populations of provinces and minor areas, and the third primarily to literacy. The preface

¹ Thiel, B. A. "Monografía de la población de Costa Rica en el siglo XIX" pp. 3-52 in *Revista de Costa Rica en el siglo XIX*. Tomo primero. San José, Tipografía nacional, 1902. x, 404 pp. F 1543 R45

² Provincial populations, reputedly based on censuses, are given for 1844, 1864, 1875, 1883, 1888, and 1892 in the following source: Departamento nacional de estadística. *Resúmenes estadísticos I*. Sección demográfica, 1883-1889. San José, Tipografía nacional, 1895. HA 803 A5 1895

⁵ Biolley, Paul. *Costa Rica and her future*. Washington, Judd and Detweiler, 1889. 96 pp. cf., p. 29; F 1543 B61

"It is very evident that the figures given, even for the last few years, cannot be considered as exact. The census-taking for the entire Republic presents, indeed, great difficulties. Outside of the plateau central the population is scattered, and the people, still ignorant, do not always lend their assistance in that of which they appreciate neither the purpose nor the utility."

⁶ Oficina nacional del censo. *Censo general de la República de Costa Rica*. . . . 18 de febrero de 1892. San José, Tipografía y litografía nacional, 1893. ccvii pp. HA 801.A5 1892

to the second volume explained that while the census of 1927 was taken according to the system employed in the United States, innumerable difficulties were encountered in carrying it out, especially poor communication and lack of competent personnel.

No national population census has been taken since 1927, despite the emphasis of the central statistical office on the importance of such a project. Annual estimates have been made on the basis of the net balance of births and in-migration, deaths and out-migration. This technique permits no valid estimates of provincial populations, and in addition yields only rough estimates for the country as a whole.⁷ A census of unemployment was taken in 1932, but economy and expediency dictated that it include the unemployed only. Hence it is of little value for population estimates.⁸

Current vital statistics are published in the *Informe* of the *Dirección general de estadística*.⁹ More detailed vital statistics were previously published in the *Anuario estadístico*, but there was a considerable hiatus between the period covered by the annual and its date of publication.¹⁰

COLONIAL AND EARLY NATIONAL CENSUSES AND ESTIMATES

Dobles-Segreda, Luis.

Índice bibliográfico de Costa Rica. Tomo v, Historia hasta 1900. San José, Librería y imprenta Lehman, 1933. 623 pp. D 1451 D63

The section, "Censos de Costa Rica," pp 576-593, summarizes data on provincial populations from censuses of 1844, 1864, 1875, 1883, 1888, 1892, and 1927. Total populations are given on the basis of censuses in 1824 and 1836.

Thiel, B. A.

"Monografía de la población de Costa Rica en el siglo XIX." Pp. 3-52 in: *Revista de Costa Rica en el siglo XIX*. Tomo primero. San José, Tipografía nacional, 1902. x, 404 pp. F 1543.R45

One table included gives the tribal composition of the Indian population during the period of discovery, 1502-1522 (p. 13) and another table gives the racial composition of the population according to "censuses" of 1522, 1569, 1611, 1700, 1720, 1741, 1751, 1778, and 1801 (p. 8), with detailed information for various of these dates given in the following pages. Data for the 19th century include a summary table giving populations of provinces and sub-provincial areas for censuses of 1824, 1836, 1864, 1875, 1883, 1888, and 1892, with estimates for 1801, 1844, and 1900. Sources of all data are discussed at some length.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Anuario estadístico, año 1934. Tomo trigésimo octavo. San José, Imprenta nacional, 1941. 387 pp. HA 802 A2

The first major section, pp. 77-109, gives summary statistics on births, deaths, and infant mortality, followed by tables for each province giving for districts the number of births and deaths, by sex; births by legitimacy status; and deaths by broad age groups. Detailed statistics on general and infant mortality follow, pp. 110-268.

Informe. . . año 1941. San José, Imprenta nacional, 1942. 78 pp.

HA 802.A7

Estimated populations and density are given for provinces, 1941. Births are tabulated by source reporting, church or civil, and by sex and legitimacy. Deaths are tabulated by age, presence or absence of medical assistance, and cause. Data on infant mortality are included. Births, deaths, and the vital index are given annually 1900-1941. Persons entering and leaving the country are classified by province.

Secretaría de salubridad pública y protección social. Departamento de biodemografía.

Aspectos biodemográficos de la población de Costa Rica Informe correspondiente al año 1940. . . . Extracto de la Memoria anual de la Secretaría de salubridad pública y protección social correspondiente a 1940 San José, Imprenta nacional, 1942. 183 pp. RA 191.C8A3

The organization of the vital statistics system of Costa Rica is described. Summary sections follow on the status of the population, causes of death, general comment, and recommendations.

Secretaría de salubridad pública y protección social. Departamento pre-escolar, escolar y educación sanitaria.

Salud. San José, Imprenta nacional, 1937. Irregular. Govt. Publ. R. R.

This periodical is devoted primarily to epidemiology and general public health problems, although it occasionally carries statistics on mortality and morbidity from specific diseases.

CUBA

Historical

Nine censuses were taken in Cuba while that country was a Spanish colony.¹ The first four counts made by the colonial government in 1774, 1792, 1817, and 1827, are thought to be quite inaccurate because of the primitive techniques used in their execution. In addition, a large proportion of the slave population appear to have been concealed by their owners, who feared that the census would be used as a basis for taxation. The general census of 1841 represented an attempt at an actual enumeration rather than merely an estimate based on various records. This census is believed to contain quite accurate statistics on the number of slaves in Cuba, although the census of 1846 again seriously understated their numbers.

The censuses of 1861, 1877, and 1887 were taken in conjunction with Spanish censuses. The statistical system of Spain had been reorganized in 1856. The General Committee of Statistics established at that time attempted to take a census of Spain in 1857. Another census was taken in 1860, and some time in the following year a count was made of the population of Cuba and Puerto Rico. Summaries of these data were published with the Spanish census of 1861 although more detailed statistics were published by the colonial government. Cuba was also included in the censuses of the Spanish Empire for 1877 and 1887. Although these counts were actual enumerations, at least of separate clusters of population, they were subject to serious limitations because of the illiteracy, slavery, and civil disorganization existing in Cuba.

These limitations were overcome to a considerable extent in 1899 when a census was taken under the auspices of the United States during the military occupation. The results of this enumeration, which included agriculture and education, are generally considered the most reliable and comprehensive ever secured for Cuba. Another census was taken by the United States Provisional Government in 1907, but it was less comprehensive. A census taken under the Cuban Republic in 1919 also included fairly detailed population data, but the most recent census, that of 1931, gave only total population by minor civil divisions. In general, the censuses since 1899 have suffered from the tendency to subordinate the entire process of the census to the purpose of securing a basis for electoral allotments.

Vital statistics for the Republic of Cuba reveal serious deficiencies.² There are wide fluctuations in the annual numbers of births reported in many areas. No statistical annual is released by the Republic, but a series of mimeographed

¹ The Report of the Census of 1899 included an account and critical examination of all the "censuses" reported as having been taken in Cuba, together with a summary of the results of the actual censuses. This work was reproduced in the Census of 1907. The 1919 census reproduced these earlier statements, as no new sources permitting their correction or completion had been found, and added the results of the census of 1907 to the summary of statistical information from previous censuses. See: Cuba. Dirección general del censo. *Census of the Republic of Cuba, 1919*. Havana, Maza, Arroyo y caso, s. en c., Printers, [1920?] pp 263-284. HA 872. 1919. A525

A chronological survey, differing in some details from that above, is given in the following source: Martínez-Fortín, Ortelo, and Martín Díaz, Mariano. "Las estadísticas sanitarias en Cuba." *Eighth American Scientific Congress Proceedings*, Vol VIII. Washington, Dept. of Interior 1942. 365 pp.

² For the historical development of vital statistics, see Martínez-Fortín, Ortelo, and Martín Díaz, Mariano. *Op. cit.*

pamphlets has included data on marriages, births, and deaths through 1935. Information on immigration and emigration is available through 1938.

A census of unemployment was taken in 1939, and a regular population census was to have been taken in 1941. There is no evidence that the latter was taken.

COLONIAL POPULATION CENSUSES

CENSUSES OF 1774, 1792, 1817, 1827, AND 1841.

Cuba. Superintendencia general delegada de real hacienda.

Informe fiscal sobre fomento de la población blanca en la isla de Cuba y emancipación progresiva de la esclava con una breve reseña de las reformas y modificaciones que para conseguirlo convendría establecer en la legislación y constitución coloniales: presentado a la superintendencia general delegada de real hacienda en diciembre de 1844, por el fiscal de la misma. Madrid, Imprenta de J. Martín Alegría, 1845. xviii, 328 pp. F 1763.C95

The following data from the censuses of 1774, 1792, 1817, 1827, and 1841 are included. The proportion of white (free) and colored (slave) persons in the population at the time of each census, and the number of white (free), colored (free) and colored (slave) persons in the censuses of 1827 and 1841.

Cuba. Comisión de estadística.

Cuadro estadístico de la siempre fiel isla de Cuba correspondiente al año de 1827 . . . Habana, 1829, 90 pp. Not located

This appears to have been the principal publication containing the data for the census of 1827.³

Resumen del censo de población de la isla de Cuba a fin del año de 1841 Habana, 1842. 68 pp. Not located

See also first citation under Census of 1846.

CENSUS OF 1846

Cuadro estadístico de la siempre fiel isla de Cuba, 1846 . . . Habana, Imprenta del gobierno y capitanía general, 1847. vii, 266, 44 pp. HA 873.1846

A folded table after p. 33 gives the population in 1846 for 12 administrative areas by race, sex, free or slave status, and age. The totals by sex and slave status are compared with similar data for 1841.

CENSUS OF 1861

Spain. Instituto geográfico y estadístico.

Censo de la población de España según el recuento verificado en 25 de diciembre de 1860 por la Junta general de estadística. Tomo II, pp. 798-809. Madrid, 1863 HA 1542 1860 (folio)

The summary of returns for Cuba includes population by race, citizenship, sex, marital status, literacy, age in five-year groups, and occupations by race by district.

Cuba. Centro de estadística.

Noticias estadísticas de la isla de Cuba en 1862 . . . Habana, Imprenta del gobierno, capitanía general y real hacienda por S. M., 1864. Pages unnumbered. HA 873 1862

This is the definitive publication of the returns for Cuba of the census taken in 1861 in conjunction with the Spanish census of 1860. Detailed information for individual clusters of population includes race, sex, and free or slave status. An age classification by race and sex is given for the 25 jurisdictional areas.

³ An unofficial source giving more detailed information on the first four censuses is the following. Sagra, Ramón de la, *Historia economico-política y estadística de la isla de Cuba, o sea de sus progresos en la población, la agricultura, el comercio y las rentas.* Habana, Imprenta de la vinda de Arozosa y Solén, 1831. HC 157.C952

This source gives the population according to the censuses of 1774, 1792, 1817 and 1827 for 18 administrative areas by race, sex, and free or slave status (pp. 3-7). The totals for 1827 agree with those in the *Informe fiscal*. De la Sagra refers to a publication of the results of a census of 1827 which he summarized in his *Anales de ciencias*, Número 32, 1830. This appears to have been the *Cuadro estadístico* cited in this bibliography.

CENSUS OF 1877

Spain. Instituto geográfico y estadístico.

Censo de la población de España, según el empadronamiento hecho el 31 de diciembre de 1877. . . . Tomo I, pp 679-693 Madrid, Imprenta de la Dirección general del Instituto geográfico y estadístico, 1879-1884 HA 1542.1877

De jure and de facto populations are given for districts by sex for four ethnic groups—Spanish, foreign, Asiatic, and colored

CENSUS OF 1887

Spain. Instituto geográfico y estadístico.

Censo de la población de España, según el empadronamiento hecho en 31 de diciembre de 1887. . . . Tomo I, pp 764-771. Madrid, Imprenta de la Dirección general de Instituto geográfico y estadístico, 1891. 2 v HA 1542 1887 (folio)

De jure and de facto populations, Spanish and foreign, are given by sex for districts, with sub-classifications by sex and race and by literacy and race.

NATIONAL POPULATION CENSUSES

CENSUS OF 1899

U. S. War Department. Cuban Census Office.

Census of Cuba Bulletin No I-III Washington, Govt Printing Office, 1900. 3 vol. in 1. 24, 15, 17 pp. HA 872 1899 A

Contents: No. 1. Total population by provinces, municipal districts and wards No. 2 Population by age, sex, race, nativity, conjugal condition, and literacy. No. 3 Citizenship, literacy and education.

Report on the census of Cuba, 1899 Lt Col J. P. Sanger . . . Director. Henry Gannett, Walter F. Wilcox, Statistical Experts. Washington, Govt Printing Office, 1900. 786 pp HA 872 1899 B

Spanish edition has title *Informe sobre el censo de Cuba, 1899* Washington, Imprenta del gobierno, 1900 793 pp HA 872 1899 B5.

A summary of the returns for earlier censuses are given, pp 179-181 Other data from whatever census counts were held to be reliable for the characteristic involved are presented in the analytical texts devoted to the distribution of the population by age, sex, race, etc The history of the non-European elements of the Cuban population is discussed

Data for the 1899 census, which covered agriculture, education, and sanitation as well as population, are presented in detail.

Cuba. Military Governor, 1899-1902. (Leonard Wood).

Ley electoral municipal adicionada con el censo de población y la ley de perjurio Habana, Imprenta de la "Gaceta oficial," 1900. 34 pp English and Spanish text, in alternate sections JL 1019.A2 1900

Folded tables II-V present condensed information on the age, sex, marital status, birthplace, citizenship, occupation and literacy of the population, including a brief analytical text by J. P. Sanger, Director of the Census.

CENSUS OF 1907

Cuba. Oficina del censo.

Censo de la República de Cuba bajo la administración provisional de los Estados Unidos, 1907. Washington, Oficina del censo de los Estados Unidos, 1908 707 pp. HA 872 1907.A

Population data presented are similar to those of the 1899 census, covering literacy and occupational data as well as race, sex, age, nativity, marital status, etc. The data from earlier censuses, published in the 1899 census, are repeated, with additions. A full discussion of the evidence for the existence and validity of the earlier censuses is included, and data from the censuses prior to 1899 are given, pp 169-183.

Cuba population, history and resources, 1907. Compiled by Victor H. Olmstead, Director, and Henry Gannett, Assistant Director: Census of Cuba taken in the year 1907. Washington, United States Bureau of the Census, 1909. 275 pp. F 1758.C949

" . . . a compendium containing data compiled from the census reports of 1899 and 1907, and other reliable sources." Population data are principally as of 1907.

Report of the work performed in the preparation of the municipal registers rendered to Honorable Charles E. Magoon, Provisional Governor of Cuba, by General José de Jesús Monteagudo, Director of the Cuban Census. Havana, 1909. 33 pp. In English and Spanish JL 1018.A3 1909
Total population, by wards, is given as of the 1907 census.

CENSUS OF 1919

Cuba. Dirección general del censo.

Census of the Republic of Cuba, 1919. Havana, Maza, Arroyo y Caso, s. en. c., Printers, 1920?. xii, 968 pp. HA 872 1919.A525

The Spanish edition has title: *Censo de la República de Cuba Año de 1919.* Habana, Maza, Arroyo, y Caso, s. en c., impresores, 1920?. xii, 977 pp. HA 872 1919.A52

The text of the 1907 volume covering the existence and validity of early censuses of Cuba is translated. Population data for 1919 are similar to those of the 1907 and 1899 censuses.

Estados que comprenden el número de habitantes y electores de la República, según la enumeración practicada el 15 de septiembre de 1919, publicados en edición extraordinaria de la "Gaceta oficial" de 28 de abril de 1920, por acuerdo de la junta nacional del censo de 9 de abril del propio año, y que se reproducen en este folleto en cumplimiento de dicho acuerdo. Habana, Imprenta y papelería de Rambla, Bouza y cía, 1920 99 pp. HA 872 1919.A5

Total population and voting population, by minor civil divisions.

Apéndice anual a la memoria del censo decenal verificado en 1919. Habana, Sloane y Fernandez, impresores, 1928. 107 pp. HA 872 A6 1919

Data from previous censuses are summarized, and estimates for the title year presented by province.

CENSUS OF 1931

Cuba. Dirección general del censo.

Censo de 1931. Estados de habitantes y electores. Habana, Carasa y cía., impresores, 1932. 106 pp. HA 872 1931.A5

Total population and electoral population are given for minor civil divisions, with comparable figures for 1919. There are no classifications by race or sex.

OTHER NATIONAL CENSUSES

Cuba. Dirección general de estadística.

Asilos de ancianos, 1936. Havana, 1937 5 pp. mimeographed. Pan Am. Union

Prepared by the *Sección de migración y trabajo*. This work was done as a preliminary step to the census of unemployment scheduled by the *Secretaría del trabajo*. Classification is by race, sex, nationality, and province.

Cuba. Ministerio de trabajo.

Census of unemployment, 1939. Not located

Unemployed persons in Cuba were classified as workers unemployed throughout the year, workers employed during the sugar season and tobacco harvest only, and small property holders or other independent persons who have been unemployed "for a considerable period of time." For a summary, see: *Bulletin of the Pan American Union*, 74 : 416. May, 1940.

CURRENT NATIONAL AND CITY VITAL STATISTICS

(Including Population Estimates)

Comisión nacional de estadística y reformas económicas.

Estadísticas, 1933. Habana, 1935. HA 871.A25

Total population and population density are given by province annually for 1929-1933. Marriages, births, stillbirths and deaths are given for municipalities by race, sex and legitimacy for 1933, with annual totals for Cuba for 1900-1933. Birth rates are charted by race, sex and legitimacy for the individual provinces.

Secretaría de sanidad y beneficencia.

Informe anual sanitario y demográfico de la República de Cuba, correspondiente al año 1934. Sanidad y beneficencia, Boletín oficial, 42 (7-12): 57-69. 1939

RA 194.C85 A45

Marriages, births, stillbirths and deaths in 1934 are given for districts by race, sex and legitimacy

Dirección general de estadística.

Autopsiados, 1934. Habana, 1937. 24 pp.

Pan Am. Union

Classification is by race, sex, cause of death, occupation, marital status, age, and nationality, for *juzgados municipales*.

Demografía sanitaria, año 1935. Habana, 1937. 10 pp.

Pan Am. Union

Statistics on marriages, births, and deaths are given for minor civil divisions by race, sex and legitimacy, with a resume by provinces for 1935 and for the country as a whole for 1900-1935. A short text is included.

Oficina nacional del censo.

Información estadística de la población de la República de Cuba en 30 junio 1935, comparada con la que existía el día del censo (21 de septiembre de 1851). Habana, 1935.

Pan Am. Union

A similar report as of December 31, 1935, was issued later. Data include population by race as of the census date and the date in the title, and population for municipalities by race and sex as of the title date.

Dirección general de estadística.

Movimiento de población, año de 1939. Habana, 1939.

Pan Am. Union

Population estimates are presented for minor civil divisions.

Ministerio de salubridad y asistencia social.

Salubridad y asistencia social. Boletín oficial 45 (1-4). Jan-April, 1942.

Govt. Publ. R. R.

Monthly statistics on mortality by cause are published for the city of Havana, Monthly morbidity data are given for the provinces.

DOMINICAN REPUBLIC

Historical

Many estimates of the population of the territory which now constitutes the Dominican Republic were made in the period between 1517 and 1920, the date of the first census¹ In 1905 the National Congress voted \$5,000 for preliminary work on a national census, but no census was taken because of the disturbed conditions in some parts of the country² Hence the census of 1920 was the first national enumeration, although it suffered in both completeness and accuracy from the lack of personnel and the military mobilization which took place in some provinces³

The second census, taken in 1935, covered race, religion, literacy, nationality, labor force, and urban-rural residence. No statistics on the age distribution of the population have been located. The results of this census were published in the issues of the *Anuario estadístico* for the years 1937, 1938, and 1939.

A Central Bureau of Statistics was established in the Dominican Republic in 1905. The task of developing a comprehensive and reliable statistical system was rendered extremely difficult by the previously unorganized condition of official statistics, as well as by severe budgetary limitations. In 1909 an effort was made to clarify the obligations of public and private personnel to supply information to the Bureau, but the political crisis of 1911 resulted in the suspension of all statistical activities for a considerable period of time.⁴ The present statistical organization was established in 1934 and 1935.

The Central Statistical Bureau is continuing its endeavors to secure prompt and complete reporting of vital statistics. Detailed tabulations are published in the *Anuario estadístico*.

NATIONAL POPULATION CENSUSES

PROPOSED CENSUS OF 1906

Oficina de estadística nacional.

Informe al ciudadano secretario de estado en los despachos de hacienda y comercio. Santo Domingo, Imp. La Cuna de América, 1906. HA 886.A3

A brief discussion of the census authorized for 1906 is included, p. 23.

INDUSTRIAL CENSUS OF 1936

The Bulletin of the Pan American Union, 72:731-732, December, 1938, cites data from an industrial census taken in 1936. Data included are total number of industrial establishments, total wages paid, and total industrial labor force, by sex and industry. F 1403 B955

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Anuario estadístico de la República Dominicana, 1940 Ciudad Trujillo, Editorial La Nación, 1941. Tomo I, 854 pp. Tomo II, 883 pp. HA 886.A35

Current vital statistics are usually presented in the first volume of this two-volume series. In the 1940 issue, separate sections are devoted to marriages, divorce, and mortality, pp. 68-414, and fertility, pp. 832-847. Migration statistics are included.

Tomo I, 1941, has been issued.

Crecimiento de la población en la República Dominicana. . . . Ciudad Trujillo, 1937-1942. About 12 pp. HB 3552.A5

This annual publication presents current vital statistics and population estimates for provinces and communes as of Dec. 31. The most recent issue includes estimates as of Dec. 31, 1941.

ECUADOR

Historical

There have been many decrees and plans for censuses throughout the history of Ecuador, but actual census statistics of any type are practically nonexistent. The area was included in the Census of Colombia in 1825.¹ A decree was passed by the National Convention of 1861 providing for a census in 1864 and each succeeding 4 years.² At least a partial census appears to have been taken under this authorization in 1864.³ Executive decrees in 1868, 1870, and 1871 provided for the immediate execution of national censuses, but apparently none were taken.⁴ A census was taken in Quito in 1906, but the decrees of the same year providing for censuses of the capitals of provinces remained dormant. Censuses were ordered in both 1929 and 1936, but neither was taken. The director general of statistics stresses the interest of the bureau in the achievement of a census. Since the execution of a national population census was impossible, an attempt was made to carry out a cattle census in 1938, but inadequate funds curtailed even this activity in 1939. There had been some hope that a census might be taken in 1940, but this did not prove to be possible.

Vital statistics are collected and published by the *Dirección general de registro civil*, which also issues yearly releases giving estimated population for provinces, cantons and cities.

There are three general sections: "Población," p. 12, "Demografía," pp. 13-32; and "Migración," pp. 33-37. These are followed by detailed tabulations for the individual years 1934-1937 inclusive. No. 6, announced for the end of 1941, will contain the comparable data for 1938, 1939, and 1940.

EL SALVADOR

Historical

The provinces of San Salvador and Sonsonate were included as a part of Guatemala in a poll taken in accordance with the *Real Orden* of Nov. 10, 1776¹ Some form of count or estimate appears to have been made of the population of the Province of San Salvador in 1807² National censuses were levied in 1878, 1882, 1892, 1901, and 1930³ A census was authorized for 1940, but funds were not appropriated for its execution

The *Dirección general de estadística* was established in 1881. Its early publications were intermittent, but they have appeared regularly since 1912 Vital statistics are published currently in the *Boletín estadístico* and in the *Anuario estadístico*.

PROVINCIAL AND NATIONAL CENSUSES

CENSUS OF 1779

Fonseca, Pedro S.

Demografía salvadoreña. San Salvador, Imprenta Rafael Reyes, 1921. 84 pp.
F 1485 F67

Ch. II, pp 48-62, "Densidad e incremento de la población," gives provincial populations for the Guatemalan provinces based on the count taken in 1778 in accordance with the Real Orden of 1776. At this time San Salvador and Sonsonate were provinces of Guatemala

Populations are also given according to censuses of 1878, 1882, 1892, and 1901.

CENSUS (?) OF 1807

El Salvador.

Estado general de la provincia de San Salvador, Reyno de Guatemala, año de 1807. Por Don Antonio Gutiérrez y Ulloa, corregidor intendente de la Provincia. Ediciones de la Biblioteca nacional. San Salvador, Imprenta nacional, 1926. 166 pp.
F 1486 G82

Population by sex, family status, race, and occupations, as of the end of 1807, prepared by Don Antonio Gutiérrez y Ulloa in accordance with the *Real Orden* of Sept. 3, 1807.

ESTIMATES (?) OF 1858-1860

El Salvador.

Estadística general de la República del Salvador, por Lorenzo López. Impresa en la Imprenta del gobierno, en el año de 1858. Ediciones de la Biblioteca nacional . . . San Salvador, Imprenta nacional, 1926. 240 pp. HA 842 1858

Tables are included giving the population by sex, marital status, age (children under 14, by sex 15-50, and total), and occupation, for the Departments of La Paz (1858), Santa Ana (1859), Cuscatlan (1859) and Sonsonate (1860). Similar classifications are also given for some subdivisions within the departments.

Oficina del censo.

Censo de población del municipio de San Salvador levantado el 15 de octubre de 1929. San Salvador, Tipografía La Union, 1930. 63 pp. HA 848. S3A5 1929

This census of the City of San Salvador was taken in 1929 preparatory to the national census of 1930. The contents are as follows. Part 1, Planning and execution of the census. Part 2, Comments on the census. Part 3, Results (Rural-urban distribution, age and sex composition, nationality, education, etc.); index; results of the classification and analysis. Part 4, Critique of the census.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Boletín estadístico No. 22. Dec. 31, 1941. 71 pp. HA 841.A3
"Sección demográfica," pp. 3-28, gives detailed classifications on marriages, births, deaths, and migration for the first half of 1941.

This publication is issued semi-annually.

Boletín estadístico extraordinario, No. 13. Divulgación científica. Dec. 31, 1941. 21 pp. HA 848 S3 1929

Estimated population and urban-rural distribution as of June 30, 1941, p. 6. Summary vital statistics, first half of 1941, by months and departments, p. 7. Migrants registered, first half of 1941, p. 8

Published irregularly as a supplement to the *Boletín estadístico*.

Anuario estadístico de 1940. Tomo No. 1, Tomo II. San Salvador, Taller nacional de grabados, 1941. Tomo I, 210, vi pp. Tomo II, 367, v pp. HA 842.A2

The first volume includes the demographic section. Estimated populations are given as of Dec. 31, 1940. Birth, death, and marriage rates are given for 1940, with an appendix giving infant mortality by age and cause, and general mortality by age, sex, and occupation. A considerable portion of the mortality analysis is based, not on rates, but on percentage distributions of all deaths.

Tomo I, 1941 has been issued.

GUATEMALA

Historical

The earliest reports of the population of the area of Guatemala indicate that it was much more densely settled before the conquest and pacification than at any time throughout the colonial period. The first census of the Kingdom of Guatemala was taken in 1778, data on provincial and village populations were published by Juarros in 1823.¹ Various estimates were made between that period and the first national census of 1880, which revealed a total population of 1,224,602. Other national censuses were taken in 1893, 1921, and 1940. The published reports of the 1940 census indicate the rather extraordinary increase of 63.76 percent in the total population of the country between 1921 and 1940, undoubtedly representing at least in part a more complete enumeration in 1940 than in 1921.

Brief resúmenes of the reports of the *Dirección general de estadística* are carried in the *Memoria de las labores del ejecutivo en el ramo de hacienda y crédito público*, while the reports of the *Registro civil* are summarized in the *Memoria de las labores del ejecutivo en el ramo de gobernación y justicia*. Detailed classifications of numbers of births and deaths by provinces and minor geographic divisions are carried irregularly in special issues of the *Boletín sanitario de Guatemala*.

A detailed analysis of the population growth and vital statistics of Guatemala was made in connection with the Carnegie Institution's medical survey of the Republic of Guatemala, published in 1938.²

HAITI

Historical

Although estimates of the population of Haiti have been made at various times by many individuals and organizations between the sixteenth century and the present, no actual enumeration of the people has ever been made. A so-called census taken in 1918-19 appears to have been an estimate based on informal counts by the communal authorities.¹ The Office of the United States High Commissioner estimated the total population in 1923 at 2,050,000. The National Service of Health of Haiti estimates the present population at 3 million persons.² Pending the execution of an actual census, there is no way of estimating even the size of the total population within a wide margin of error.

A statistical bulletin of the Republic published by Antoine Laforest in 1913 contains figures for 24 communes which he states are the preliminary results of a census which had already been in progress for over a year.³ No final results of this count have been located.

Vital statistics, published by the National Health Service, are based on a civil registration system. The extent of under-enumeration is obviously great.⁴ For instance, the recorded death rate per 1,000 estimated population was 3.4 in 1940 and 3.1 in 1941. The National Health Service was reorganized in 1940, with the goal of improving the civil registration system. However, the public health budget of Haiti was reduced for 1940-1941, with the result that public health services had to be contracted.⁵

Because the great bulk of the Haitian population belongs to the Catholic Church, parochial estimates of population and church records of baptisms, marriages and interments constitute an important source of information on the Haitian population. Fortunately, the boundaries of the dioceses of the Catholic Church in Haiti correspond fairly well to the boundaries of the administrative departments of the Republic.

NATIONAL POPULATION "CENSUSES" AND ESTIMATES

Haiti.

Bulletin des statistiques de la République d'Haiti, publié par Antoine Laforest. Octobre 1912-Septembre 1913. Port-au-Prince, Imprimerie de l'Abeille, 1913. 316 pp. HA 881 A3

This volume, published under the auspices of the *Secrétaire d'état de l'intérieur*, contains a note on population, pp. 8-9. According to this note, no count or census had ever been taken. The Department of the Interior had been attempting

⁴ Service national d'hygiène et d'assistance publique. *Rapport annuel du directeur général, 1939-40*. Port-au-Prince, 1941. Pan American Union Library

The director states, p. 139: "En attendant, nous continuons, comme par le passé, à présenter des statistiques de vitalité et de morbidité qui, en ce qui concerne les informations fournies par les officiers de l'État-Civil, restent bien au-dessous de la vérité."

⁵ Thebaud, Jules, *op. cit.*

to take a census for over a year, but only 24 communes were covered, not including Port-au-Prince. The population for these 24 communes is reported, generally by urban-rural residence.

Estimated Catholic populations by diocese are quoted for 1912, and the total Protestant population estimated. The total thus yielded is compared with a private estimate of the total population.

Vital statistics for Port-au-Prince for the title year are given for three areas of the city by month, births being reported by sex and legitimacy status, and deaths by sex and adult-child classification.

United Kingdom. Department of Overseas Trade.

Report on economic conditions in the Dominican Republic and in the Republic of Haiti. London, H M Stationery Office 19- to date HC 157 S2G7

These reports, usually written by the consuls at Port-au-Prince, include population estimates and brief discussions. The issue for 1924-1925 estimates the population at 2½ million, but states that "a recent publication by the clergy gives the figure as 2,628,000." This same issue reproduces estimates of the population of eleven towns, crediting them to the Gendarmerie d'Haiti. The issue for 1936, the first report issued after the evacuation of the American forces, describes the racial and social composition of the population. Total population is estimated at "in the neighbourhood of three million."

Sixty-seventh Congress, First Session, Pursuant to S Res. 112, authorizing a special committee to inquire into the occupation and administration of the territories of the Republic of Haiti and the Dominican Republic. Part I, Aug. 5, 1921. Part 2, Oct. 4 to Nov. 16, 1921. Part 3, Nov. 29, 1921. Washington, Govt Printing Office, 1922. 1842 pp. F 1926 U54

The report by Carl Kelsey, *The American intervention in Haiti and the Dominican Republic*, pp 1279-1315, states that no census has ever been taken. Population is estimated at 2,000,000, as contrasted to a population of 550,000 in 1880. This source also gives summary descriptions of origin, distribution, towns, health, and economy.

U. S. High Commissioner to Haiti.

Data on the physical features and political, financial and economic conditions of the Republic of Haiti. American High Commissioner, Republic of Haiti, April 1923. 8 pp. F 1926 U573

Total population, population density, interior population, and population of the leading eight cities are estimated.

Later issues of the High Commissioner's report include information on health conditions and activities, but none on population *per se*.

Province ecclésiastique d'Haiti.

Le bulletin de la quinzaine, paraissant tous les quinze jours 15 ème année, Nos. 19-20. Dimanche, 22 Janvier, 1939. Statistique générale du clergé et des congrégations religieuses de la Province ecclésiastique d'Haiti au 22 Janvier 1939. Private Library

The Catholic population of the five dioceses of Haiti is given, p. 240. These diocesan populations can be taken as approximations of departmental populations because more than 95 per cent of the inhabitants are members of the Catholic Church, and the boundaries of the dioceses correspond fairly well to the departmental boundaries. Population of individual parishes is given, pp. 243-246.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Haiti. Service national d'hygiène et d'assistance publique.

Rapport annuel du directeur général, 1940-1941. Port-au-Prince, 1942. 197 pp. RA 194 H2A3

This report has been published intermittently since 1928. It includes estimated total populations, vital statistics compiled from the Civil Register, and morbidity and mortality statistics based on hospital records.

The statistics included in these annual reports reveal the inadequacies of official statistics. If the "census" population of 1,631,000 in 1918-1919 and the official estimate of 3,000,000 in 1940 are accepted, the geometric rate of increase would be almost three per cent. In 1940, there were only 45.6 thousand registered births

and 14 8 thousand registered deaths, whereas a population of 2 5 million with a birth rate of 40 and a death rate of 20 would yield 100 thousand births and 50 thousand deaths [Statistics given by Giorgio Mortara in: *Revista brasileira de estatística* 2 (7). July-Sept. 1941]

LOCAL VITAL STATISTICS

Archidiocèse de Port-au-Prince.

Annuaire de l'Archidiocèse de Port-au-Prince, 1939. Port-au-Prince.

Prinak Library.

Annual vital statistics for the Catholic population include the number of baptisms, marriages and interments, by parish.

OTHER CURRENT NATIONAL POPULATION STATISTICS

Duvivier, Ulrick.

Bibliographie générale et méthodique d'Haiti. Tome I, II. Port-au-Prince, Imprimerie de l'état, 1941. Tome I, 318 pp. Tome II, 411 pp. Z 1531 D.88

Sections referring to population materials are as follows. *Ethnologie-Ethnographie*, Tome I, pp. 74-80. *Sciences médicales*, Tome II, pp. 169-206.

Vincent, Sfenio. *Président d'Haiti.*

Efforts et résultats. Port-au-Prince. Imprimerie de l'état, 1938. F 1926.V76

A discussion of the problems with which the new government of Haiti is attempting to deal and of the measures taken to solve them. There are sections dealing with land ownership, education, and health problems.

HONDURAS

Historical

The Republic of Honduras has a long history of both population estimates and censuses. Soon after Señor Obispo Fray Fernando de Cadiñanos arrived in 1788 as head of the Diocese of Comavagua, he started a series of systematic visits to all parts of the diocese. His counts of settlements and souls were transmitted to the Real and Supreme Council of Indias, they constitute the census of 1791. The Governor of the Province, Don Ramón de Anguiano was responsible for another census in 1801, which included lists of settlements, and the number of Spanish and Spanish-speaking families, unmarried men and Indian taxpayers in each. The majority of the Indians were omitted.¹

Estimates are available for 1826 and 1850. The first approximation to a census in the modern meaning of the term was that taken in 1881 under the direction of Francisco Cruz as chief of the recently organized *Dirección general de estadística*. However, this census was not levied systematically department by department.² Official sources refer to a count of 1887, but only detailed estimates of the population as of December 31, 1888, were located. A census of 1895 is also mentioned.³

A census was attempted in 1901, but its coverage appeared so incomplete that the statistical office refused to accept it without adjustments. Inspection revealed that in cities where the census was thought to be good the number of men in military service and personal service on road work constituted a fairly regular proportion of the total population. This proportionate relationship was then used to estimate the total populations of the various areas.⁴ Another census, taken in 1905, yielded a smaller population than the corrected figures for 1901. The director of the 1905 census consequently based his comparisons on the actual returns in both 1905 and 1901.⁵

National censuses with a somewhat greater degree of validity were taken in 1910, 1916, and 1926. Quinquennial censuses have been taken since 1930.

Resumen del censo general de población levantado el 30 de junio de 1940. Tegucigalpa, Talleres tipográficos nacionales, 1942. 214 pp. HA 821.A5 1940

Statistics are given for major and minor civil divisions, age and sex, urban and rural distributions, civil status, race, nationality, occupation, religion, education, and literacy.

An analysis of trends, 1881, 1887, 1910, 1916, 1926, 1935, and 1940 is included.

CURRENT NATIONAL VITAL STATISTICS

Dirección general de sanidad.

Boletín sanitario. Revista trimestral. Año 1, Jan, 1926. Last available, Año VIII, Nos. 31 y 32, June 1, 1941. RA 191 H6A25

Recent issues have carried a section entitled: "Datos demográficos de la República de Honduras durante los años comprendidos de . . . a . . ." Data include births by sex and legitimacy status, deaths, infant mortality, stillbirths and marriages.

Secretaría de gobernación, justicia, sanidad y beneficencia.

Informe de los actos realizados por el poder ejecutivo en los ramos de gobernación, justicia, sanidad, y beneficencia Presentado al Congreso nacional por el secretario de estado Ing. Abraham Williams, año fiscal de 1940 a 1941. Tegucigalpa, 1941. 281 pp. J 181.R2

Vital statistics, primarily for 1940 and 1941, are given in the following section: "Estadística nacional, Informe de la labor realizado en la Dirección general de estadística durante el año económico de 1940 a 1941." Births are classified by color and legitimacy status; marriages by marital status, nationality, and age; and deaths by age, marital status, religion, occupation and cause. Tabulations are by departments. Migration statistics are included.

There is also a section on population, "Resumen del censo general de población levantado el 30 de junio de 1940." pp. 161-172.

MEXICO

Historical

Many attempts to estimate or count the population of Mexico were made throughout the first three centuries of the colonial period, although only fragmentary records exist for most of them¹. The first official survey was made in 1579-82, when Philip II of Spain ordered an inventory of the physical, natural, social, and economic resources of the territories under his rule. The original manuscripts of this census are in the Mirabeau B. Lamar Library of the University of Texas.

Three surveys are known to have been prepared in the latter part of the sixteenth century, while eight were made in the seventeenth century, in 1607-10, 1614, 1625, 1652, 1662, 1664, and 1655. None of these were published. A general inventory of the population and economy of the country was undertaken in 1742. However, the first comprehensive attempt at an actual enumeration of the population came in 1791. Returns were incomplete both as to area and coverage, and the results were never published in any detail². Many estimates were made throughout the nineteenth century, but no attempt was made to take another census until 1895, when the first of the 6 national censuses was taken. The results of this census were published in considerable detail in some 30 volumes, although inadequate preparation, lack of cooperation on the part of large parts of the native Indian population, and similar factors impaired the accuracy of both the census of 1895 and that of 1900. The census of 1921 was taken according to the European system, with the heads of the individual families filling out the schedules. The normal difficulties of securing accurate census statistics during this period were further complicated by the aftermath of the past decade of violent political upheaval.

The *Dirección general de estadística*, established in 1923, was in charge of the planning and execution of the 1930 census. Careful plans were made, and an experimental census taken in the State of Morelos in 1929. The problems which emerged were then discussed at the Second Statistical Conference in Mexico City in 1930³. The result was that the returns of this census were far more complete and accurate than those of any preceding census in Mexican history.

The development of census techniques and materials in the last decade has not been limited to the population field. The census law of May 23, 1938, provided for a decennial population census, an agricultural-livestock census in the years

¹ This summary statement relies heavily on the section on Mexico, pp. 773-776, in *Economic Literature of Latin America*. Detailed bibliographies of colonial and national population and vital statistics publications are included in the *Bibliografía mexicana de estadística*, Tomo 1, published by the Dirección general de estadística, 1941. See also Bojórquez, Juan de Dios. "Las actividades estadísticas de México," pp. 359-376 in, Inter American Statistical Institute. *Op. cit.* A study based on the original census records and computation sheets of the Census of 1790 has just been published. See Cook, S. F. "The population of Mexico in 1793," *Human Biology* 14 (4) 499-515. Dec., 1942. GN I B8

² Forty volumes of the returns are preserved in the *Archivo de la nación* in Mexico City. The records of local censuses taken in 1796, 1800, 1801, 1811, 1812, and 1813 are also housed in the *Archivo de la nación*.

³ Departamento de la estadística nacional. *Segunda reunión nacional de estadística*. 20 de diciembre de 1929 a 8 de enero de 1930. México, D. F., 1930. 262 pp. HA 12.5 R4

ending in zero, a decennial census of buildings in the years ending in nine, and industrial, commercial, transport, and land censuses every 5 years.⁴ The last population census, that of March 1940, was part of a general census which included the Sixth Census of Population, the Second Census of Agriculture and Livestock; the Second Public Land Census; the Second Building Census; the Third Industrial Census; the First Business Census, and the First Transportation Census.⁵ Preliminary returns of these various censuses were published currently in the *Revista de estadística*, the monthly statistical bulletin of the *Dirección general de estadística*.

Vital statistics for Mexico are available for the 25 years between 1886 and 1910, but are lacking for the period between 1911 and 1921. Since 1922 the Mexican Government has devoted increasing attention to the problems involved in securing accurate and comprehensive statistics. Despite the general improvement during the last two decades, under-registration of births still constitutes a problem and the validity of the statistics on causes of death for rural areas is questionable. Current vital statistics are published in the *Anuario estadístico* and in the monthly *Revista de estadística*. The former publication contains definitive figures, with detailed classifications for the individual States, while the latter usually contains national data only. It includes some preliminary data for a later period than that covered by the *Anuario*.⁶

NATIONAL POPULATION CENSUSES

COLONIAL AND EARLY NATIONAL ESTIMATES AND CENSUSES⁷

Bojórquez, Juan de Dios.

"Las actividades estadísticas de México." pp. 359-376 in: Inter American Statistical Institute, *op cit* Washington, 1941. 842 pp. HA 175 S75

Dirección general de estadística.

Z 7554 M6M6

The section on demography, pp. 143-181, includes 503 titles on status, vital statistics, migration, and population policy.

⁴ Inter American Statistical Institute *op cit*, p. 352.

⁵ Agricultural and livestock censuses were taken in 1930 and 1940, volumes for the individual States for 1930 are still in process of publication, and only preliminary returns are available for 1940. Building censuses, which included housing data, were taken in 1929 and 1939, and have been published in full. Epidal censuses, covering the twelve months preceding the census data, were carried out in 1935 and 1940 by the *Dirección general de estadística* in cooperation with the *Departamento agrario*, the *Secretaría de agricultura y fomento*, and the *Banco nacional de crédito*. The industrial censuses of 1930, 1935, and 1940 were carried out by a combination of personal interview and correspondence. The censuses of 1935 and 1940 covered only those concerns which had produced goods valued at \$10,000 or more during the previous year.

⁶ Statistics on immigration and emigration have been gathered since 1908, but the classifications from year to year are not comparable. Detailed historical statistics are published in the *Anuario estadístico*. In 1939 the government began the collection of data on the permanency of tourists entering and leaving the country. A special series on this subject is included in the *Revista de estadística*.

⁷ Estimates and counts are available for various local areas. Data indicating the population growth of the Federal District from 1524 to 1940 are presented in the following publication: *Departamento del Distrito Federal. Oficina de estadística y estudios económicos. Memoria del 1° de septiembre de 1940 al 31 de agosto de 1941.* México, D. F., Talleres gráficos de la Penitenciaría del Distrito Federal, 1941. Govt. Publ. R. R.

Anuario estadístico de los Estados Unidos Mexicanos, 1940. México, D F, 1942. 806 pp HA 762 A3

Section II, *Población del país*, contains historical estimates and data from the various censuses. The discussion of sources of early population estimates and censuses includes a tabular compilation of total population from 1521 to 1940.

The *Secretaría de educación pública* also issued a volume of instructions: *Instrucciones a los C. C. directores de educación federal, profesores, inspectores y maestros primarios y rurales, para que sustenten pláticas ilustrativas sobre los próximos censos de población, agrícola-ganadero, e industrial de 15 de mayo de 1930.* México, D. F., 1930. Pan American Union.

A preliminary experimental census was taken in 1929 in the state of Morelos. No separate publication was located. The *Departamento de la estadística* issued the following pamphlet: *Instrucciones para la ejecución de los censos en el estado de Morelos, 25 de julio de 1929.* México, D. F., 1929. 9 pp

There is a uniform plan of presentation for each volume. Population is given by sex for county and township units. Distribution by size of place is given for census years from 1900 to 1930, and age distribution by quinquennial age groups by sex for 1921 and 1930. Marital status is given by sex and age for 1930, and literacy for persons ten years old and over is given by sex for counties. The total is classified by occupation and sex for 1921 and 1930 and by nationality and sex for census years from 1900. Classification by place of birth is for 1921 and 1930, by sex. Language spoken is recorded for all persons five years old and over. The population is further classified by size of family and the presence of physical or mental defects. Each volume contains a copy of the census schedule.¹⁰

Quinto censo de población, 15 de mayo de 1930. Resumen general. México, D. F., Talleres gráficos de la nación, 1934. xxvi, 269 pp. Govt. Publ. R. R.

Classifications used in this volume are in general the same as those in the individual state volumes, except that few characteristics are given for units smaller than the state. Labor force status is given by sex for each state for census years from 1900 to 1930.

Quinto censo de población, 15 de mayo de 1930. Población municipal. . . México, D. F., Talleres gráficos de la nación, 1934. 38 pp. HA 761 1930 A5
State summaries of municipal populations, by sex only.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Departamento de salubridad pública. Dirección general de epidemiología.

Boletín de demografía y estadística sanitaria, Vol 1, No. 1, junio de 1942 México, D F, 1942 Govt Publ R R.

This bulletin is to include reports on the demography of the states, municipalities and localities in which the Department of Public Health has offices, and on the public health activity in these various areas. The contents of the first issue are as follows: "El servicio de salubridad en la República Mexicana" Por Francisco de A Benavides; "Geografía médica" Por Alfredo C Aldama. "Geografía física y climatología de la República" "Mortalidad por enfermedades infecciosas y parasitarias en la República" Por Ricardo Gramillo "Defunciones registrados en la ciudad de México, durante el año de 1940" Por Joaquín M. Sánchez

Dirección general de estadística.

Anuario estadístico de los Estados Unidos Mexicanos, 1940 México, D F., 1942 806 pp HA 762 A3

Section II "Movimiento de la población," pp 87-245, includes an introduction defining the concepts used in the classification of Mexican vital statistics. There is a summary table giving estimated total population and number and rates of marriages, births, deaths, and infant deaths, annually for 1893-1910 and 1922-1939. Current rates are based upon preliminary 1940 populations. Vital statistics for 1937-1940 are classified by rural-urban residence and by age, legitimacy, literacy, and occupation. Other tables present historical and contemporary information on migration and naturalization.

Mortalidad en México. México, D F, 1942 119 pp. Govt. Publ R R.

A graphic and tabular presentation of data for the nation and the various States

Revista de estadística. México, D. F., March, 1938, to date. Govt. Publ R R.

National data are presented on marriages, divorces, births, deaths, infant deaths, deaths by cause, and natural increase. See: *Ibid*, 6(4). April, 1943. Since 1941 the inside back cover of each issue has contained series giving the numbers of and rates for births and deaths, 1930-1940. Special articles are sometimes included, i e, "Defunciones por entidades y causas, año de 1940." *Ibid*. 5(2): 182-189. Feb., 1942.

Revista del Instituto de salubridad y enfermedades tropicales México, D. F.; 1940 to date. Govt. Publ. R R.

Detailed studies in the general fields of mortality, morbidity and public health are often included in this periodical. For instance, see Bustamante, Miguel E., and Aldama C.. Alvaro "Variación mensual del número de defunciones y principales causas de mortalidad por estados." *Ibid*. 2(3-4): 259-277 1941. Also, by the same authors: "Mortalidad de menores de un año en la República Mexicana y en el Distrito Federal, 1922-1939." *Ibid*. 3(2): 81-92. 1942.

OTHER CURRENT OFFICIAL POPULATION STATISTICS**Bustamante, Miguel E., and Aldama C.. Alvaro.**

"Esperanza de vida" en veinte estados de la República Mexicana. *Revista del Instituto de salubridad y enfermedades tropicales* 2(1). 5-18. June, 1941.

Govt Publ. R. R.

Expectation of life at decennial ages is presented for twenty states comprising 74.71 percent of the population of Mexico and so chosen as to be representative of all geographical, climatological, and economic areas of the country. The provinces were Baja California (Territorio Norte), Sonora, Coahuila y Tamaulipas, Baja California (Territorio Sur), Sinaloa, Jalisco y Colima, Michoacán, Oaxaca y

Chiapas, Veracruz, Campeche y Yucatán, Zacatecas, Aguascalientes, Guanajuato, México, Puebla, and the Distrito Federal. The implications for public health and national policy are indicated.

Tablas de vida de los habitantes de los Estados Unidos Mexicanos. *Revista del Instituto de salubridad y enfermedades tropicales* 1(2) 131-150. May, 1940. Govt. Publ. R. R.

The provisional life tables, based on the 1930 census, are presented for the total population by sex, together with special tables for the State of Aguascalientes.

Departamento de salubridad pública.

Población y salubridad pública. . . por el Dr. Alberto P. León. . . Secretario general del Departamento de salubridad pública. . . México, D. F., 1940. 25 pp. HB 885 M4

The trends in population, natural increase, expectation of life, infant mortality, deaths from specific causes, and other indexes are compared for the United States and Mexico, with some reference to other American countries.

Dirección general de estadística.

Informes sobre las principales estadísticas Mexicanas. México, D. F., 1941. 174 pp. Govt. Publ. R. R.

This series of reports on the development and present status of the statistical activities of the Mexican government includes the following. "Censo de población," por Alfonso de Garay Alvarado, "Censos de edificios e industrias de la construcción," por Alfonso de Garay Alvarado, "Movimiento de población," por Manuel B. Trems Marentes, "Morbilidad y sanidad," por Manuel B. Trems Marentes, "Censos ejidales," por Ing. Adolfo Alarcón Mendizábal.

México en cifras, 1938. México, D. F., Talleres gráficos de la nación, 1939. Unnumbered. HA 762.A5 19—

This illustrated compendium gives population data from the 1930 census, labor force data from the industrial census of 1935, vital statistics for 1936, and immigration and emigration for 1928-1936. Graphic materials on agricultural and industrial production, communication, commerce, and finance are included.

López Rosado, Diego G.

Atlas histórico geográfico de México. México, 1940. 109 pp. F 1227 L85

The section on the pre-Cortez epoch includes brief discussions and maps of the probable path of immigration into America, the major lines of the great migrations, the location and extension of the various cultural areas, principal cities and ethnic groups. The section on the colonial epochs includes a similar series of maps for the period from 1400 to 1786.

NICARAGUA

Historical

There is little definitive quantitative information on the historical development of the population of Nicaragua prior to 1920.¹ The Guatemalan Province of Nicaragua was included in the Spanish count of 1778.² A trial census appears to have been taken in 1800; a new census, taken in 1813, was published in some detail in 1823 by General González Saravia in his *Bosquejo político, estadístico de Nicaragua*. This author also published estimates of the rate of natural increase, based on data relative to marital status and vital statistics compiled while he was Governor of the Province. Another census was attempted in 1834, but its results were recognized to be so defective that they were not published. A count is reported to have been attempted in 1845 and 1846. Another census was levied in 1867; materials available two decades later included a list of the inhabitants of each department, with name, age, sex, and occupation. However, these lists compiled by the *Ministerio de gobernación* appeared so grossly inadequate that the official gazette published figures raising the total population by almost four-fifths. A census in 1890 is cited by some students. There was some type of a census in 1906, although there are conflicting reports on its nature and extent. It has been variously described as a provisional census, a census of the department of Granada, and the only census to include business, livestock, and the mining industry. It was reputedly published in bulletins released regularly each month from July 1907 on.³

The value of these early estimates, partial counts, and incomplete censuses is seriously questioned by the students of Nicaraguan population history.⁴ The first national census was taken in 1920, but even the introductory statement to the census itself discusses its inadequacies. Another national census was taken in 1940, but only preliminary data are available as yet.

The first *Anuario estadístico* of the *Dirección general de estadística*, published in 1939 and covering the year 1938, includes vital statistics. There is also a *Boletín mensual de estadística*, published currently, which gives quarterly or semiannual vital statistics. This serial has also served as the vehicle for the publication of the preliminary results of the 1940 population census.

The reports of the various municipalities often present vital statistics in summary form.

PANAMA

Historical

The general paucity of historical statistical materials for Panama is explainable in terms of the unsettled political history of the country. The Province of Panama was organized in 1719 under the Viceroyalty of Santa Fé. In 1739 it became a province in the Colombian federation of Nueva Granada. A union called the Isthmus of Panama was formed in 1841, but it was soon suppressed by Colombia. Between 1841 and 1903, when the independence of Panama was finally achieved, there were few periods of stability undisturbed by revolts. Even after the achievement of independence, administrative changes were so frequent as to prohibit the development of continuous statistical series of any types.¹

The introductory statement to the first volume of the Panama census of 1920 discusses various early estimates, including one of 1793, but discards them as unreliable.² The territory was included in the Colombian census of 1870, but no further censuses were attempted prior to the national census of 1911.³

National censuses have been taken in 1911, 1920, 1930, and 1940. A law passed in 1906 provided for the taking of a census, but execution was delayed until 1911. The second census was taken in 1920, since only three of the provincial volumes could be located, there is a possibility that it was never published in full. The third national census, that of 1930, was the first in which the native people were enumerated rather than estimated. The fourth national census was taken in 1940. Careful preparations were made, with tracts delimited in such a way that the enumerator could cover his territory in 8 hours. Only questions on sex, knowledge of Spanish and literacy were asked of the native peoples. Schedules were edited before the release of the preliminary figures, and when necessary were returned for completion. The preliminary releases are now appearing in *Estadística panameña*, the new serial publication of the *Dirección general de estadística*.

The administrative changes and the general poverty of the governmental offices have reacted against the possibility of continuous collection and publication of vital statistics. The *Anuario de estadística*, 1934, issued by the *Secretaría de agricultura y obras públicas*, was the first yearbook in 23 years, although sporadic publications between 1903 and 1934 had given vital statistics. The *Sección de estadística* of the *Ministerio de agricultura y comercio* issued an *Anuario* in 1939 which contained demographic statistics. Current vital rates are published occasionally in the *Boletín de trabajo, comercio e industrias*, as well as in the new *Estadística panameña*.

PARAGUAY

Historical

The economic and political history of Paraguay has been such that no complete and accurate census has ever been taken, although counts have been attempted several times in the nation's history. A long series of estimates lay back of the census of 1886. The first issue of the *Anuario estadístico*, that for 1886, presents estimates for the year 1536, 1775, 1828, 1852, 1857, 1861, 1872, and 1886.¹ According to these estimates, the population increased from less than 100,000 in 1536 to 1,300,000 in 1861, and then was reduced to 231,000 in 1886 after the War of 1865-70 against Argentina, Brazil and Uruguay. In the absence of any information as to the basis of the estimates, these figures must be accepted with considerable reservation. There is little doubt but that the losses in the war against the Triple Alliance were great, but the difference between the estimate of 1861 and the census population of 231,000 in 1886 cannot be assumed to constitute a measure of their magnitude.²

The first national census was taken on March 1, 1886, in order to determine the size of the legislature. The probable extent of its incompleteness is indicated by the fact that its results were not accepted by the officials. A special section of the 1886 *Anuario*, entitled *Cuadros del censo general de la República*, presents tables on population by sex and nationality, and some age data for 37 parts of the country.³ A census was taken during the years 1899-1900, but no publications or official references were discovered.⁴ An electoral census was taken in 1917. An attempt was made to secure authorization for a census in 1930, but it failed.⁵ A population census was attempted in 1936-37, although the revolution at the beginning of 1936 impeded the work.⁶ There seems to be considerable question within Paraguay as to the completeness of this census. Significantly, no published data from it could be located. The Director General of Statistics, Alfonso B. Campos, reported in 1940 that the total population of the country for this "census" was consistent with that estimated on the basis of the vital rates of the city of Asunción.⁷

Vital statistics based on a Civil Registry system are published currently, but detailed tabulations are available primarily for the city of Asunción.

⁶ Campos, Alfonso B. "Las actividades estadísticas del Paraguay." Pp. 440-442 in. Inter American Statistical Institute. *Op. cit.*

⁷ "... la cifra de la población del país hallada por medio de dicho censo, corresponde al porcentaje de natalidad del movimiento demográfico de la capital determinado sobre cifras positivas." *Ibid.*, p. 442.

The introductory section on the history of Paraguay presents a graph, "Cuadro comparativo del aumento de la población desde el año 1536 hasta el año 1886," apparently based on estimates made in 1536, 1775, 1828, 1852, 1857, 1861, 1872, and 1886. According to this, the population, less than 100,000 in 1536, increased to 1,300,000 in 1861, and was reduced to about 231,000 in 1886.

Ch. II, pp. 41-64, summarizes early estimates of population. It, together with the final section of the yearbook, pp. 212-265, summarizes the results of the census of March 1, 1886, with reference to population by sex, nationality, citizenship status, physical defects, education, distribution and occupations. Data are given for 37 parts of the country. Vital statistics are included.

PERU

Historical

The first quantitative data on the size and distribution of the population of Peru were secured by the Inca. The centralized political organization and economy of their Empire necessitated the use of estimates or statistics on the number and characteristics of the population. Counting was done by means of quipu, cords of multicolored threads in which knots were used to represent fixed numbers. A centralized administrative system was developed to transmit the data from the local areas to the capital city¹

Population and other statistical data for the period of the Viceroyalty are included in the volumes of the *Mercurio Peruano*, published in Lima between 1791 and 1795². Many estimates, partial enumerations, and even complete local enumerations were made throughout the seventeenth and eighteenth centuries. The most detailed information was that secured in the censuses of 1741 and 1795, both of which were taken by order of the King of Spain³.

There were numerous statistical compilations of population data during the early part of the nineteenth century. The Constitutions of 1823 and 1828 had given the departmental councils authority to take population censuses, the Constitution of 1855 gave similar powers to the municipalities. In 1828 the municipalities were ordered to make civil registers of the citizens having the right to vote; in 1834 the order was extended to include the making of a complete enumeration of the population. The *Consejo central directiva* was established in 1848, with the responsibility of developing and coordinating statistics of all types. However, this organization did not prove particularly successful, and a law of 1853 provided for the establishment of a *Sección estadística* in the *Ministerio de gobierno*, which was to assume responsibility for census enumeration. A national population census was taken in 1862.

Further reorganization of the statistical service occurred in 1873, when the *Dirección de estadística* was divided into three sections, *Estadística de población*, *Estadística del territorio*, and *Estadística del estado*. A vital statistics service was organized in 1876, and a national population census was taken the same year.

And. Graña y Reyes, Francisco *La población del Perú a través de la historia* Tercera edición. Lima, Imprenta Torres Aguirre, 1940. 50 pp HB 3575.G7 1916c

This census, issued in seven volumes, is not only the first comprehensive census published for the country, but also the only national census in the 64-year period between 1876 and 1940. Great difficulties were experienced in the actual enumeration, partially because of the complexity of the census itself, partially because of the general conditions of the country at that time. A law providing for personal taxation for school purposes had just been passed, and large proportions of the people assumed that the census was intended as a base for the preparation of tax lists.

The estimation of the size of the population of Peru during the several decades before the census of 1940 was extremely difficult. There were some censuses of special groups and special areas, but no enumeration of the total population.⁴ Hence the data of the census of 1940 were of great importance to all the statistical organizations of Peru. Careful preparations were made to insure its completeness and accuracy. Preliminary surveys were carried out to establish exact lists of populated centers, a careful tract delimitation procedure was followed, and an intensive educational campaign was carried on through posters, direct mail, and the school system. Enumerators were carefully chosen and instructed. Special care was taken in connection with remote places, such as those of very high altitudes. In the case of the Amazon and other jungle Indians, reliance had to be placed on the estimates of missionaries, traders, and governmental personnel who were in intimate contact with the Indians.

Different types of schedules were used for the various size classes of the population, the amount of the data requested being greatest for the nine largest cities and least in the rural areas. The census schedules included questions on sex, race, age, marital status, education, religion, nationality, and occupation. Fertility data, apparently collected only for persons enumerated on the so-called family schedule, i. e., those in the nine largest cities, included the number of children born alive, number of years since first birth, and number of children still living.

The annual publication of the *Dirección nacional de estadística*, the *Extracto estadístico del Perú*, is the most accessible source of population data for Peru. Vital statistics for all of Peru have been published in this annual since 1923. A monthly *Boletín*, also issued by the *Dirección nacional de estadística*, presents some demographic data, but only two issues, one of 1936 and one of 1938, were located. The *Dirección general de salubridad* issues a quarterly, the *Boletín del Instituto nacional del niño*. Periodicals published by some municipalities, such as Lima and Cuzco present vital statistics in greater detail or of a more recent date than those in the *Extracto estadístico*.

Detailed vital statistics are included. The last issue available is that for Nov.-Dec., 1941.

UNITED STATES

Historical

The local and colonial governments in the area which later became the United States made many attempts to estimate or count the numbers of their citizens. Knowledge of the size of the population was desired primarily because it would permit estimates of tax yields and of manpower available for defense against Indian or other attacks. The inquiries of the Lords of Trade concerning population were also an important factor stimulating many governors to undertake censuses.¹ Most of the population data from the Colonial period, however, consist of partial enumerations and estimates of various types. The latter were usually computed on the basis of the number of militia, polls, tax lists, and families, or houses, with a multiplier used to secure total population. A recent attempt to determine the population of the Colonies in 1775 had to rely on partial estimates for New Jersey, Delaware, and Virginia, on tax lists for Pennsylvania and North Carolina, and on governors' estimates and land grants for Georgia.²

The Constitution of the United States provided that an enumeration of the population "be made within 3 years after the first meeting of the Congress of the United States and within every subsequent term of 10 years."³ The first census, that of 1790, was taken by United States marshals, who secured information on the name of the head of the family, and the number of white males under 16 years old and 16 and over, white females, other free persons, and slaves. The censuses between 1790 and 1900 continued to be taken by an organization created temporarily for the purpose, although the scope of the census inquiries and the complexity of the tabulations expanded fairly continuously through the ensuing century of rapid economic and political expansion. An industrial census was first attempted in 1810, although the results were not particularly satisfactory. The scope of the census was broadened in 1840 to cover population, mines, agriculture, commerce, manufactures, and schools, with its defined objective to " . . . exhibit a full view of the pursuits, industry, education and resources of the country."

Technical improvements accompanied the expansion of the scope of the census. In 1830 a printed schedule was used for the first time. The census of 1850 was the first to be taken on the basis of a separate line for each individual. In 1880 a separate and specially trained force of supervisors and enumerators replaced the United States marshals as enumerators, and an attempt was made to obtain the

³ This résumé of the history of the decennial census is based on a more detailed historical note prepared by the Division of Statistical Research of the Bureau of the Census.

data in one month instead of the 10 to 20 required for previous censuses. Tabulations by electrical machinery appeared in connection with the Census of 1890. Finally, in 1902, a permanent Census Bureau was established in the Department of the Interior, later transferred to the Department of Commerce and Labor, and finally to the Department of Commerce.

The technical and administrative improvements between the first scientific census, that of 1850, and the comprehensive sixteenth census of 1940, have permitted a vast expansion in the amount and variety of data secured. The population census itself has expanded to a comprehensive report on such personal characteristics as age, color, sex, marital status, and place of birth, education, migration, employment status, occupation, and income; and for each household, tenure and value or rent. In 1940 a 5-percent sample of the population also provided information on nativity of parents, mother tongue, veteran's status, social security, usual occupation, industry and class of worker and, if a married, widowed, or divorced woman, the number of children ever born. A census of housing was included for the first time in 1940.

Censuses of manufacturing were taken in 1810, 1820, and 1840, decennially from then to 1904, quinquennially from 1904 to 1919, and biennially from 1919 until the suspension of the 1941 enumeration because of the war. A special census of mineral industries has been taken decennially since 1840. Information on agriculture has been gathered at every decennial census since 1840, and in quinquennial censuses of agriculture in 1925 and 1935. Special surveys of irrigation and drainage have been made in conjunction with the census of agriculture, the former since 1910, the latter since 1920. Censuses of business were taken in 1930, 1933, 1935, and 1939, covering retail trade, wholesale trade, and various classes of service establishments. Construction was included in 1929, 1935, and 1939. Information on churches was obtained in the decennial censuses for some decades after 1850. In 1906, this subject became a separate inquiry instead of being included in the decennial census as it had been until 1900. Censuses of religious bodies are now taken decennially in every year ending in six.

The first official vital statistics for the United States were collected as a part of the decennial census of 1850. Some vital data were requested in each census between 1850 and 1900, but when the Bureau of the Census was made permanent in 1902 the Director was authorized to obtain copies of records filed in the vital statistics offices of those states and cities which had registration systems meeting the minimum standards set by the Director. The annual collection of mortality statistics began with the calendar year 1900, although a national birth registration area was not established until 1915. Birth and death registration areas did not become nation-wide until 1933.

It is obvious that a complete bibliography of the census publications of the United States could not have been included within the limited space of this bibliography, even if personnel had been available for the gigantic task involved in the compilation of such a list. Hence the bibliography which follows is limited to the major published volumes of the Decennial Censuses and current national vital statistics. More detailed historical and bibliographical surveys are included in the following publications:

 244 Nos. in 6 vols. Published at irregular intervals under title *Census bulletin*. Nos. 1-3, of an administrative character, were not issued for general distribution.

OCCUPATIONS

Occupations at the Twelfth Census. Washington, Govt. Printing Office, 1904. cclxvi, 763 pp. HA 201.1900 B2
Statistics of women at work, based on unpublished information derived from the schedules of the Twelfth Census: 1900. Washington, Govt. Printing Office, 1907. 399 pp. HA 201.1900.B2

⁴ The Twelfth Decennial Census was limited by law to the four fields of population mortality, agriculture, and manufactures. Other subjects were to be covered after the work of the Decennial Census was completed. The Census Office was made a permanent agency of government in 1902. Hence many subjects previously covered in the Decennial Censuses became inter-censal inquiries, and special statistical reports replaced the former decennial publications. For a list of these publications, see Bureau of the Census, Circular of information concerning census publications, 1790-1916. Jan 1, 1917, Washington, Govt. Printing Office, 1917. 124 pp. Z 7351 U5U5 1916

A social-economic grouping of gainful workers of the United States. Gainful workers of 1930 in social-economic groups, by color, nativity, age, and sex, and by industry, with comparative statistics for 1920 and 1910. With appendix. 1938. 279 pp. HD 8064.A5 1930a

Special report on foreign-born white families by country of birth of head With an appendix giving statistics for Mexican, Indian, Chinese, and Japanese families . 1933 217 pp
HB 3015 A5 1930b

CENSUS OF 1940

POPULATION

Bureau of the Census.

Sixteenth Census of the United States 1940. Reports Washington, Govt Printing Office, 1940-1943

Population (I) *Number of inhabitants* Total population for States, counties, and minor civil divisions, for urban and rural areas, for incorporated places; for metropolitan districts; and for census tracts (II) *Characteristics of the population* Sex, age, race, nativity, citizenship, country of birth of foreign-born white, school attendance, education, employment status, class of worker, major occupation group, and industry group Reports by States 7 pts (III) *The labor force* Occupation, industry, employment, and income Reports by States 5 pts. (IV) *Characteristics by age* Marital status, relationship, education, and citizenship Reports by States 4 pts

The statistics presented in each of the above volumes were first published, and are still available, in the form of a series of separate bulletins for each State and a summary bulletin for the United States In their separate form, the sections of Vol. I comprise the first series of Population bulletins for the States; those of Vol. II comprise the second series etc

Population Internal migration, 1935 to 1940 A series of reports based on tabulations from the 1940 population census

Color and sex of migrants Washington, Govt Printing Office, 1943 viii, 490 pp (In press)

Other reports, including one on State of birth by State of residence, are planned in this series

Population. Characteristics of the nonwhite population by race Washington, Govt Printing Office, 1943 vi, 112 pp

Population Special report on the institutional population 14 years old and over Characteristics of inmates in penal institutions, and institutions for the delinquent, defective, and dependent. Washington, Govt. Printing Office, 1943. iv, 361 pp.

Population. Nativity and parentage of the white population. A series of three bulletins based on a 5-percent sample of the population Washington, Govt Printing Office, 1943 (In press)

General characteristics. Age, marital status and education for States and large cities. vi, 279 pp

Country of origin of the foreign stock By nativity, citizenship, age, and value or rent of home, for States and large cities vi, 122 pp

Mother tongue By nativity, parentage, country of origin, and age, for States and large cities vi, 58 pp

Population Differential fertility 1940 and 1910. A series of reports based on sample tabulations of the population data for 1940 and 1910.

Fertility for States and large cities Age, color, and marital status of women 15 to 74 years old, classified by number of children ever born, and number of children under 5 years old and 5 to 9 years old Women by age at marriage and duration of marriage . . . Washington, Govt. Printing Office, 1943 viii, 281 pp. (In press)

Other reports are planned in this series.

Population. Education, occupation, and household relationship of males 18 to 44 years old. Prepared by the Division of Population, Bureau of the Census, of the Department of Commerce, in cooperation with the Special Services Division of the War Department Washington, Govt. Printing Office, 1943, vi, 59 pp.

Population. The labor force (sample statistics) A series of six reports based on tabulations of sample statistics from the 1940 population census Washington, Govt. Printing Office, 1943 (In press)

Employment and personal characteristics. vi, 177 pp.

Employment and family characteristics of women. vi, 212 pp.

Wage or salary income in 1939. vi, 194 pp.

Occupational characteristics vi, 256 pp.

Industrial characteristics. iv, 174 pp.

Usual occupation. iv, 63 pp.

Population Characteristics of persons not in the labor force, 14 years old and over. Age, sex, color, household relationship, months worked in 1939, and usual major occupation group. Washington, Govt. Printing Office, 1943. vi, 117 pp.

Population Comparative occupation statistics for the United States, 1870 to 1940. A comparison of the 1930 and 1940 census occupation and industry classification and statistics; a comparable series of occupation statistics, 1870 to 1930; and a social-economic grouping of the labor force, 1910 to 1940. Washington, Govt. Printing Office, 1943. (In press)

POPULATION AND HOUSING

Population and Housing. Statistics for census tracts. Washington, Govt. Printing Office, 1941-1943.

A series of bulletins, one for each of 60 tracted cities, presenting basic population and housing statistics by census tracts. Accompanying maps show the principal boundary streets for each tract. Population items include sex, age, race, nativity, citizenship, country of birth, education, employment status, class of worker, and occupation. Housing items include occupancy, tenure, value or monthly rent, type of structure, state of repair and plumbing equipment, size of household, race of head of household, persons per room, radio, refrigeration equipment, and heating fuel by type of heating equipment.

Population and Housing. Families. A series of reports based on tabulations of sample statistics from the 1940 population and housing censuses. Washington, Govt. Printing Office, 1943. (In press)

General characteristics. States, cities of 100,000 or more, and metropolitan districts of 200,000 or more. Tenure, size of family, number of children, labor-force status of children, number of lodgers and subfamilies, number of persons in labor force, family employment status, family wage or salary income in 1939. . . . vi, 332 pp.

Types of families. Regions and cities of 1,000,000 or more. vi, 221 pp.

Employment status. Regions and cities of 1,000,000 or more. v, 110 pp.

Family wage or salary income in 1939. Regions and cities of 1,000,000 or more. iv, 156 pp.

Tenure and rent. Regions, cities of 1,000,000 or more, and metropolitan districts of 500,000 or more. vi, 141 pp.

Income and rent. Regions, and metropolitan districts of 1,000,000 or more. vi, 237 pp.

Characteristics of rural-farm families. Regions and divisions. Tenure, occupation of head, and value or rent, cross-classified by selected housing characteristics, family characteristics, and characteristics of head. iv, 82 pp.

HOUSING

Housing (I) Data for small areas. Selected housing statistics for States, counties, and minor civil divisions; for urban and rural areas; for incorporated places; and for metropolitan districts. Reports by States, 2 pts. (II) *General characteristics.* Occupancy and tenure status, value of home or monthly rent, size of household and race of head, type of structure, exterior material, year built, conversion, state of repair, number of rooms, housing facilities and equipment, and mortgage status. Reports by States. 5 pts. (III) *Characteristics by monthly rent or value.* These statistics form the basis for determining the relationship between rent or value and such characteristics as type and age of structure, state of repair, number of rooms, size of household, race of head, persons per room, housing facilities and equipment, and mortgage status. Reports by States. 3 pts. (IV) *Mortgages on owner-occupied nonfarm homes.* First mortgages by amount outstanding, type of payment, frequency and amount of payment, interest rate, and holder of mortgage. All mortgaged properties by value of property, estimated rental value, year built, and color of occupants. . . . Supplements A and B show mortgage data for homes built in 1935-1940, and homes occupied by nonwhite owners, respectively. Reports by States. 3 pts.

The statistics presented in each of the above volumes were first published, and are still available, in the form of a series of separate bulletins for each State and a summary bulletin for the United States. In their separate form, the sections of Vol. I comprise the first series of Housing bulletins for the States; those of Vol. II comprise the second series. . . . etc.

Housing Block statistics Supplements to the first series of Housing bulletins for States (Housing, Vol I). Washington, Govt. Printing Office, 1941-1943

A series of supplemental bulletins, one for each of the 191 cities which in 1930 had a population of 50,000 or more, showing selected housing statistics for the city by blocks. Data are also presented by census tracts for certain cities, and by wards for other cities. Each bulletin includes a map of the given city by blocks.

Housing Analytical maps. Block statistics Prepared by the New York City WPA War Services and the Bureau of the Census; distributed by the Bureau of the Census, 1942 to date

A series of bulletins, one for each city of 100,000 inhabitants or more, comprising sets of analytical maps presenting in graphic form various housing characteristics in different areas of the city. Includes maps for average rent, major repairs or bathing equipment, year built, nonwhite households, persons per room, owner occupancy, and mortgage status.

AGRICULTURE

Agriculture. (I) First and second series State reports. Statistics for counties. Farms and farm property, with related information for farms and farm operators, livestock and livestock products, and crops. 6 pts. (II) *Third series State reports.* Statistics for counties. Value of farm products, farms classified by major sources of income, farms classified by value of products. 3 pts. (III) *General report* Statistics by subjects. Washington, Govt. Printing Office, 1942-1943.

HA 201 1940.A4

Agriculture Cows milked and dairy products. Washington, Govt. Printing Office, 1943. vi, 556 pp. HD 9275 U6A45 1940A

Agriculture. Cross-line acreage. Washington, Govt. Printing Office, 1943. iv, 311 pp.

Agriculture Drainage of agricultural lands. Washington, Govt. Printing Office, 1942. xvi, 683 pp. HD1683 U4A5 1940

Agriculture. Irrigation of agricultural lands. Washington, Govt. Printing Office, 1942. lxx, 689 pp. HD1725 A5. 1940

Agriculture Special cotton report. Washington, Govt. Printing Office, 1943. xv, 265 pp.

Agriculture Farm characteristics by value of products An analysis of specified farm characteristics for farms classified by total value of products. Washington, Govt. Printing Office, 1943. (In press)

A report based on a 2-percent sample of farms reported in the 1940 census of agriculture and prepared cooperatively by the Bureau of Agricultural Economics and the Bureau of the Census.

BUSINESS

Census of business, 1939. (I) Retail trade (Pt. 1) Not yet issued. (Pt. 2) Commodity sales and analysis by sales size. (Pt. 3) Kinds of business, by area, States, counties, and cities. (II) Wholesale trade. (III) Service establishments, places of amusement, hotels, tourist courts and tourist camps. (IV) Construction. (V) Distribution of manufacturers' sales. Washington, Govt. Printing Office, 1942-1943.

MANUFACTURES

Manufactures, 1939. (I) Statistics by subjects. (II) Reports by industries. 2 pts. (III). Reports for States and outlying areas. Washington, Govt. Printing Office, 1942. HD 9724.A4. 1940b

LIFE TABLES

United States life tables, 1930-1939. Preliminary. For white and nonwhite by sex. Washington, 1942. 14 pp

These are the first life tables based on the results of the 1940 census of population and on the mortality experience of the decade. Life table values are shown for every year of age.

United States abridged life tables, 1930-1939. Preliminary. By geographic divisions, color and sex. Washington, 1942. 15 pp.

These life tables, the first separate tables for geographic divisions covering the entire United States, are based on the mortality of 1930-1939. Life table values are also shown for the death registration States of 1920 and 1930.

United States abridged life tables, 1939, urban and rural, by regions, color, and sex Washington, 1943 18 pp

Abridged life tables are presented by urban and rural residence color, and sex, for the continental United States and three major regions Life table values are shown separately for the following urban-rural classes (1) cities of 100,000 or more, (2) other urban places, and (3) rural territory

OTHER

Areas of the United States 1940. Washington, Govt Printing Office, 1942 465 pp.

Unincorporated Communities United States, by States Washington, Govt. Printing Office, 1943 iv, 32 pp

Total population of unincorporated communities having 500 or more inhabitants for which separate figures could be compiled

CURRENT NATIONAL VITAL STATISTICS

GENERAL

Bureau of the Census.

Vital statistics of the United States 1940 (Part I) Natality and mortality data for the United States tabulated by place of occurrence, with supplemental tables for Hawaii, Puerto Rico, and the Virgin Islands (Part II) Natality and mortality data for the United States tabulated by place of residence 1941 Part I, iv, 657 pp Part II, iii, 283 pp HA 203 A22

The summary and rate tables in Part I are as follows: (I) Population, number of births and deaths, and crude rates the registration States, United States, 1900-1940 (II) Enumerated population by cities and rural areas, and by race United States and each State, April 1, 1940 (III) Enumerated population by age, race and sex United States, April 1, 1940 (IV) Population United States and each State, 1930-1940 (V) Population, number of births and deaths, and crude rates specified countries, 1938 (VI) Population, number of births and deaths, and crude rates specified countries and selected years (VII) Crude birth rates United States, each division and State, 1916-1940 (VIII) Crude stillbirth ratios United States, each division and State, 1922-1940 (IX) Crude death rates United States, each division and State, 1916-1940 (X) Infant mortality rates United States, each division and State, 1916-1940 (XI) Deaths from each cause and crude death rates United States, 1939 and 1940 (XII) Crude death rates for selected causes of death United States each division and State, 1940. (XIII) Population, births, deaths, infant mortality, and stillbirths United States, each State by urban and rural areas and by race, and individual counties and cities by race, 1940 There are also general tables on live births, stillbirths, total deaths, and infant deaths, and a special joint-cause-of-death table Selected tables are included for Hawaii, Puerto Rico, and the Virgin Islands

Part II gives tabulations by place of residence rather than place of occurrence. Fertility data in this part are classified by geographic area, race, nativity, and age of parents, sex, number of children, and type of attendance Mortality data are classified by geographic area, cause of death, sex, race, and institution

Manual of the International List of Causes of Death (Fifth Revision) and Joint Causes of Death (Fourth Edition) 1939 452 pp 1940

The International List, as adopted for use in the United States, is based on the Fifth Decennial Revision by the International Commission, Paris, October 3-7, 1938. The Manual of Joint Causes of Death is incorporated in this volume

Physicians' Handbook on Birth and Death Registration, 1939. iii, 94 pp

VITAL STATISTICS—SPECIAL REPORTS

This series consists of eighteen volumes, to date Even-numbered volumes, through Vol. 10, are annual vital statistics summaries for each State Odd-numbered volumes through Vol. 9, are selected reports and studies on special topics Vol. 11 was a special series of State reports on motor-vehicle accident mortality Vols. 12 and 15 were continuations of odd-numbered Volumes 1 through 9 Vol. 14 was a continuation of the State summaries Vol. 13 was a special volume devoted to detailed reports on hospital and institutional facilities.

Current volumes are as follows:

Vol. 16 Mortality summary for registration States Washington, July 7, 1942, to May 15, 1943

The first report consists of an introduction and basic population data. Other reports present statistics on mortality as follows: 2 All causes 3 Typhoid and paratyphoid fever 4 Scarlet fever 5 Whooping cough 6 Diphtheria 7 Tuberculosis (all forms) 8 Tuberculosis of the respiratory system 9 Dysentery 10 Malaria 11 Syphilis (all forms) 12 Measles 13 Cancer (all forms) 14 Cancer of female genital organs 15 Cancer of the breast 16 Diabetes mellitus 17 Exophthalmic goiter 18 Pellagra (except alcoholic) 19 Alcoholism (ethylishm) 20 Intracranial lesions of vascular origin 21 Diseases of the heart (all forms) 22 Chronic rheumatic diseases of the heart 23 Diseases of the coronary arteries and angina pectoris 24 Diseases of the heart 25 Bronchitis 26 Pneumonia (all forms), and influenza 27. Bronchopneumonia 28 Lobar pneumonia 29 Pneumonia (unspecified) 30 Influenza 31 Ulcer of stomach or duodenum 32 Diarrhea, enteritis, etc 33 Appendicitis 34 Hernia and intestinal obstruction 35 Cirrhosis of the liver 36 Biliary calculi and other diseases of the gallbladder and biliary ducts 37 Nephritis (all forms) 38 Senility 39 Suicide 40 Homicide 41 All accidents 42 Motor-vehicle accidents 43 Ill-defined and unknown causes 44 Locomotor ataxia (tabes dorsalis) 45 General paralysis of the insane 46 Aneurysm of the aorta 47 Syphilis (other forms) 48 Cerebrospinal (meningococcus) meningitis 49 Smallpox 50 Poliomylitis and poliomyelitis (acute) 51 Diseases of the prostate 52 Diseases of pregnancy, childbirth, and the puerperium 53 Puerperal septicemia 54 Puerperal toxemias 55 Congenital malformations and diseases peculiar to the first year of life 56 Congenital malformations 57 Congenital debility 58 Premature birth 59 Injury at birth 60 The infant (under 1 year of age) 61 The preschool child (1-4 years of age) 62 The school child (5-14 years of age) 63 The youth (15-24 years of age) 64 The young adult (25-44 years of age) 65 The middle-age adult (45-64 years of age) 66 The older ages (65 years and over) (Nos. 63-66 are in preparation)

Vol. 17 Selected studies Nov. 28, 1942 to May 15, 1943

- 1 Announcement of Volume 17—selected studies
- 2 A summary of natality and mortality data: United States, 1941.
- 3 Deaths from selected causes: United States, 1941.
- 4 Live births by person in attendance: United States, 1941.
- 5 Deaths from puerperal causes: United States, 1941
- 6 Deaths from each cause: United States, 1939-1941.
7. Births, deaths, infant deaths, and stillbirths, each State 1941.
- 8 Accident fatalities in the United States, 1941.
- 9 Marriage statistics—Resident brides and grooms by age: collection area, United States, 1940
- 10 Live births by month: United States, 1941
11. Stillbirths by person in attendance: United States, 1941.
12. Illegitimate live births by race: United States, 1938-1941.
- 13 Marriage statistics—Resident brides and grooms by previous marital status: collection area, United States, 1940.
14. Marriage statistics—Marriages occurring in collection area, by place of residence of brides and grooms, 1940.
- 15 Number of deaths and death rates by age, race, and sex, each State 1941 (by place of residence)
16. Deaths in institutions by type of service and control, each State 1941
17. Deaths under 1 year from selected causes, by age and race, and rates by race 1941 (by place of residence)
18. Studies in the completeness of birth registration—Part I. Completeness of birth registration: United States, December 1, 1939 to March 31, 1940
19. Deaths by race, sex, and cause: United States, 1941.
- 20 Births, deaths, and infant deaths, each State county, and city: 1941 (Births and deaths by place of residence, infant deaths by place of occurrence).
- 21 Births and deaths by place of occurrence and by place of residence, each State: 1941
22. Marriage statistics—Marriages by racial type and by age of resident groom, by age of bride: collection area, 1940
23. Marriage statistics—Resident brides by age and race: collection area, 1940.
24. Deaths and death rates for selected causes, by age, race, and sex. United States, 1941.

Vol. 18. State summaries of vital statistics, 1941. Jan. 5, 1943 to May 15, 1943.

All tabulations except those for counties are by place of occurrence. Rates are based on revised population estimates for the years 1900 to 1939. Rates for 1940 and 1941 are based on the enumerated census populations for each State and on estimated populations for the District of Columbia and United States totals. The United States summary and the reports for each State have been issued.

OTHER

Weekly mortality index. Deaths in major cities for week ended . . . Vol. 14, 1943.

Data are presented for ninety cities, based on weekly telegraphic reports on death certificates received in each reporting city bureau.

Monthly vital statistics bulletin. Vol 6, 1943

Provisional birth, death, and infant death figures are given for each of forty States, and for the cities of Chicago, New Orleans, Baltimore, Boston, and New York, and for the Territory of Hawaii. The annual summary for 1942, contained in Vol. 5, No. 13, was issued March 30, 1943.

Current mortality analysis, based on the returns of a 10-percent sample of death certificates received in vital statistics offices. Vol 1, 1943

A discussion of mortality trends for the month is followed by tables on numbers of deaths and death ratios for selected causes, by geographic divisions. Variation charts are given for selected diseases and areas. No. 3, for January 1943, was available in the latter part of March.

Motor-vehicle accident deaths.

Vol 7 was the last volume issued prior to the suspension of the series for the duration of the war, as announced on January 18, 1943. Statistics were given for geographic divisions, and were issued in weekly releases and quarterly summaries.

The Registrar. Washington, Bureau of the Census. Vol 8, No. 5, May 1943.

This monthly publication contains news notes and reports from the Division of Vital Statistics.

Summary of motor-vehicle accident fatalities (quarterly) contains a compilation of statistics on motor-vehicle accident deaths based on a special transcript form filled out by State bureaus of vital statistics and State traffic authorities. An annual summary is issued about 6 months after the end of each year.

SPECIAL PUBLICATIONS

Vital statistics rates in the United States, 1900-1940, (in preparation) approximately 1000 pp. A detailed compilation of death rates by age, race, sex, cause, and geographic area for the period 1900-1940 and of birth rates by age of mother, race, number of children, and geographic area for the period, 1915-1940. Corresponding population tables are included.

Vital statistics of the United States, Part III, Supplement, 1939-1940, (in preparation) approximately 550 pp. A compilation of birth and death data for local areas tabulated by place of residence. Most of the figures shown are two-year totals. Six summary tables giving two-year average birth and death rates are included.

URUGUAY

Historical

The only population statistics available for Uruguay prior to the middle of the nineteenth century consist of the estimates of travelers, plus the results of municipal enumerations in Montevideo in 1813 and 1816, and an official estimate in 1829 for the country as a whole ¹ The first census to receive official recognition, that of 1852-53, was never published in any detail, although it appears to have been used as a basis for estimates. Some data from it were included for comparative purposes in the report on the Census of 1860 ² A brief report on population by nationality and sex appears to have been all that was published from the Census of 1900. The last national census was taken in 1908. An industrial census was taken in 1937, but the brief reports on number of workers in industrial establishments are an insufficient basis for population estimates.

NATIONAL POPULATION CENSUSES

CENSUS OF 1852

No separate publications were located. See pp. 33-34 of the 1860 census for provincial populations from this census.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Anuario estadístico de la República Oriental del Uruguay, año 1939. Volumen 1, Tomo 46, Publicación 157 Montevideo, Imprenta nacional, 1941 417, xcvii pp Govt Publ R R

The section on *Población* gives estimated populations for departments as of Dec 31, 1938, natural and migratory increase, 1939, and estimated population and density as of Dec 31, 1939. Vital statistics from the *Registro del estado civil* are presented for departments, by years, 1930-1939 inclusive. The more detailed statistics for 1939 include deaths by cause for departments. The section on *Migración* summarizes international migration statistics for 1939. There is a section on *Higiene y salud pública*.

Síntesis estadística año 1940. Publicación 156, No 18 Montevideo, 1941. 215 pp, xl Govt Publ R R

Part II, "Población," gives population estimates as of Dec 31, 1939, based on the 1938 estimates plus or minus natural increase and migration. The increase of population is surveyed from 1889 to 1939, while vital statistics trends are presented for 1930 to 1939. Detailed statistics are presented for marriage, divorce, fertility and mortality, 1939. Part IV covers *Higiene y salud pública*.

The summary of the report of the *Dirección general de estadística* includes a descriptive article on selected aspects of mortality, and tables on estimated population and vital rates for 1940. There are tables on deaths, 1889, 1909, 1919, 1929, and 1939, by age; mortality for departments by sex, 1936-1940, mortality by marital status and nationality, and mortality by cause.

Dirección general del registro del estado civil.

El movimiento del estado civil y la mortalidad de la República Oriental del Uruguay en el año 1940 Anuario de la Dirección general de estadística Montevideo, Imprenta nacional, 1941 74 pp HA 1073 A45.

Fertility data include births for departments by sex, and paternal nationality; marriage statistics for departments include classifications by age, education, and literacy. Detailed tabulations on general and infant mortality are also included.

CURRENT CITY VITAL STATISTICS

MONTEVIDEO

Montevideo, Municipalidad de.

Boletín mensual de estadística 39(453)·1-7. May, 1941. HA 1089 M8A2
Estimated population, migration, vital statistics, for the city as a whole and for sections.

Dirección de censo y estadística. *Resumen anual de estadística municipal* Vol 22, 1924. Montevideo, Imprenta nacional, 1926 281 pp HA 1089 M8A3

In addition to *vital* and migration statistics for 1924, there are estimates of population, 1889-1924, and migration 1879-1924.

VENEZUELA

Historical

The first reported census of Venezuela is that taken by Bishop Martí between 1772 and 1784, covering about half of the area of the country.¹ A summary of the many estimates of counts of the late colonial and early national period was included in the three-volume *Memoria* published by the *Dirección general de estadística* in 1873. A discussion of validity and method is included.²

National population censuses were taken in 1873, 1881, 1891, 1920, 1926, 1936, and 1941. The value of the two earliest censuses has been questioned seriously because of inconsistencies between the two. Regulations were published for a census in 1910, but apparently it was never taken. The Census of 1936 was carried out by a General Commissariat of the Census created especially for the purpose. A nation-wide organization was developed, and census schedules were distributed 15 days before the census date. These schedules were filled in by the heads of households and collected on the day set for "taking" the census. Only preliminary data are available from the Census of 1941.

Vital statistics are now collected and tabulated by the section on Demography of the General Bureau of Statistics. The new system, instituted on January 1, 1937, provided that local registration records be sent directly to the General Bureau of Statistics.³ It is hoped that this national system will permit the development of more accurate vital statistics than those formerly secured by the combination of the reports of the statistical services of the individual states.

NATIONAL POPULATION CENSUSES

EARLY COUNTS

Dirección general de estadística.

Memoria de la dirección general de estadística al Presidente de los Estados Unidos de Venezuela en 1873. Maracaibo, Librería, Picón, 1873. Vol. I, xvi, 311 pp. Vol. II, 320 pp. Vol. III, 288, xxxvii pp. HA 1091.1873

Vol. I presents estimates of the population of provinces and cities during the 18th century. Vol. II contains a chapter on population, pp. 245-264, which gives summary figures ascribed to official censuses of 1825, 1838, 1844, 1846, 1847, 1854, and 1857. Vol. III gives data from a census of Caracas taken in 1869.

See also *Ibid* "Ensayo de demografía Venezolana." Caracas, Lit y Tip. Casa de especialidades, 1938. 48 pp. HB 3579 V3

² Dirección general de estadística. *Memoria de la Dirección general de estadística al Presidente de los Estados Unidos de Venezuela en 1873.* Maracaibo, Librería, Picón, 1873. Vol. I, xxi, 311 pp. Vol. II, 320 pp. Vol. III, 288, xxvii pp. HA 1091.1873

Vol. I discusses colonial censuses briefly and presents data for various provinces from censuses taken in 1822, 1825, 1829, and 1869. Census data are given for the cantons of the Province of Caracas for 1825, 1829, and 1833. Vol. II, pp. 245-264, surveys early estimates and counts. The appendix in Vol. III gives summary figures from an 1869 census for Caracas.

CURRENT NATIONAL VITAL STATISTICS

(Including Population Estimates)

Dirección general de estadística.

Anuario estadístico de Venezuela, 1940. Caracas, Tipografía Venezuela, 1941. vi, 710 pp. HA 1091 A42

This yearbook, the second since the reorganization of Venezuelan statistics, presents data for the years 1939 and 1940. The second part, "Estado y movimiento de la población," pp 21-147, gives summary data from the Census of 1936. Vital statistics include marriages, births, deaths and stillbirths by states by months, and migration, 1940. Numbers of marriages, births and deaths are also given by sex for minor civil divisions, 1940 and 1939. International statistics are then presented, based on data from the *Statistical Yearbook of the League*, with modifications of the rates for Venezuela.

Other sections of this *Anuario* present summary data from the agricultural, industrial and commercial censuses.

Boletín mensual de estadística, junio, julio y agosto de 1941. Año I (6-8), June-Aug, 1941 Caracas, 1942 Govt Publ R R.

Sección III, "Sección de estadísticas demográficas," presents vital statistics for the second quarter of 1941, with comparative summaries for 1936-1941. Migration statistics are also included for the second quarter of 1941.

Ministerio de sanidad y asistencia social. Dirección de salubridad pública.

División de epidemiología y estadística vital.

Relación anual de la sección de estadística vital, año 1939. Caracas, Lit. y tip. del comercio, 1940. 322 pp. Pan Am San. Bur.

The first section, "Población," gives some population estimates for selected areas. There are estimates for the city of Caracas for the years 1934-1939, and an analysis of the post-censal increase. The section, "Natalidad," presents detailed statistics for selected areas. There are estimates for the city of Caracas for the years 1934-1939, and number of births by sex and legitimacy status for the provinces. The section, "Mortinatalidad," presents statistics on stillbirths in Caracas, 1939. The section, "Mortalidad," includes statistics on general, maternal and infant mortality, and deaths from selected causes. An appendix describes the organization of the Vital Statistics Branch and reproduces the forms employed in births and death registration. This is the first issue of a contemplated annual publication.

Part II

**AMERICAN SECTIONS OF THE
BRITISH COMMONWEALTH
OF NATIONS**

CANADA

Historical

The earliest recorded population counts in Canada date back to the founding of Port Royal in 1605 and Quebec in 1608. Estimates of the population in New France from 1608 to 1631 were based on yearly arrivals and departures, recorded vital statistics, and the memoirs and works of Champlain, Leclercq, Sagard, and others¹. The earliest census, taken in New France in 1666, secured information on age, sex, occupation, and conjugal and family conditions. Fifteen additional censuses were taken prior to the end of the French regime in 1763, as well as seven for Nova Scotia and one for Prince Edward Island. In addition, 30 estimates, based primarily on local authority, cover the years 1665-1763.

Censuses were taken less frequently during the British colonial period, information being secured primarily from the reports of the colonial governors. Censuses of Canada were taken in 1765, 1784, and 1790. Upper Canada had annual censuses from 1824 to 1842, while Lower Canada had censuses in 1825, 1831, and 1834. After 1831 periodic censuses were taken of the western settlements².

After Upper and Lower Canada were united, an act of 1841 provided for a census of all the provinces in 1842 and every fifth year thereafter. However, the census of Upper Canada was taken in 1842, that of Lower Canada in 1844. The census of Upper Canada of 1848 was the result of a similar act in 1847. An act passed in August 1851 provided that a census be taken in January 1852, in 1861, and every tenth year thereafter. Nova Scotia, New Brunswick, and Prince Edward Island also had censuses in 1851, so that actual national censuses date from 1851, although the first census after confederation was that of 1871.³

A complete listing of all counts and censuses of Canada from the earliest period to the present is given in the first volume of the Census of 1931. The Dominion Bureau of Statistics plans to publish a historical volume which will include all censuses taken since the founding of Port Royal, with a critique of the accuracy of each.⁴

An outstanding aspect of Canadian census development is the census of the Prairie Provinces. This regional census originated in the censuses of Manitoba and the Northwest Territories in 1886, which were followed by another census of Manitoba in 1896. The Census and Statistics Act was amended in 1905 to provide for a census of Manitoba, Saskatchewan, and Alberta in 1906 and every tenth year thereafter.⁵ "The primary purpose of the census is to fix a basis for

the per capita allowance payable to the provinces by the Dominion Government." More frequent censuses in these western provinces are therefore considered essential, since conditions change more rapidly than in the rest of the Dominion

EARLY ESTIMATES AND CENSUSES

Department of Agriculture.

Censuses of Canada, 1665 to 1871. *Census of Canada, 1871.* Vol. IV. Ottawa, I B Taylor, 1876 lxxxv, 422 pp HA 741 1871

The introduction presents a chronological list of the censuses and statements of population from the founding of Port Royal in 1605 to 1871. The major portion of the volume consists of summaries of censuses taken at different periods in and for the various territories of British North America. Ninety-eight official documents are summarized: 25 for Quebec, 22 for Ontario, 16 for Nova Scotia, 10 for Manitoba, 8 for New Brunswick, 6 for Prince Edward Island, and 1 for British Columbia. "The tables of this volume contain the information afforded by official documents, manuscript or printed, preserved in libraries and amongst the Public Archives, but classified and arranged uniformly so as to be easily consulted."

Preliminary report on births, deaths, and marriages in the second quarter of 1942. Ottawa, 1943. 6 pp. Mimeo Bilingual Govt Publ R R

Births, deaths, and marriages, by province, causes of death for selected causes, maternal mortality from selected causes, compared with fourth quarter of 1940, deaths at all ages from specified causes by provinces, résumé of births, deaths, and marriages by provinces, 1941, deaths at all ages for specified causes, by provinces.

Registration of births, deaths, and marriages, March, 1943 Enregistrement des naissances, décès et mariages, Mars, 1943. 2 pp Mimeo. Govt Publ. R R

This monthly report gives numbers of births, deaths, and marriages in cities, towns, and villages with populations of 10,000 and over, based on a count of the registrations filed during the month

OTHER CURRENT NATIONAL POPULATION STATISTICS

Dominion Bureau of Statistics.

The Canada Year Book, 1942. Ottawa, King's Printer, 1942. 1030 pp

HA 744 S81

Chapter IV. Population, pp. 82-99. Section 1 consists of census statistics of the general population since 1871. It includes total population, percentage distribution, and percentage change by provinces and territories, area and density of population by provinces, counties, and census divisions (1941), density in various countries of the world, and a summary of births, deaths, natural increase and immigration, with estimated populations as of June 1, 1921-40. Section 8 gives rural and urban distribution, 1871-1931. Section 10 gives the population of cities and towns of over 5,000 inhabitants, 1871-1941. Section 17 gives estimates of the population for intercensal years. Section 18 is a discussion of the National Registration of 1940. Some additional material on population in the 1941 census is presented in Appendix III.

Chapter V, pp. 100-150, consists of five sections devoted respectively to marriages, births, deaths, natural increase, and vital statistics of the Yukon and Northwest Territories.

Chapter VI. Immigration and colonization, pp. 151-170, presents statistics on the growth of immigration, sex and conjugal condition, languages and racial origin, countries of birth and nationalities, destinations and occupations, rejections, and juvenile, refugee and oriental immigration. There are sections on emigration and colonization activities.

Appendix III, pp. 1004-1006, contains a table on sex distribution of the population, by provinces, 1871-1941.

Census figures for 1941 are preliminary.

NEWFOUNDLAND AND LABRADOR

Historical

Population information for Newfoundland has been collected at fairly short intervals since the founding of St. John's in 1613. There are several estimates for the next 67 years, the last of these being for 1680. The first census, taken in 1687, covered only French population and agriculture. Figures for the British population from 1714 through 1792 are included in the Newfoundland Report 1793, Appendix 6. Since no information is given as to the method of taking any of these counts, it is impossible to estimate their accuracy.

The first complete census of Newfoundland was taken in 1845, and censuses of Newfoundland and Labrador have been taken regularly since 1857. A complete list of censuses and estimates was published in Volume 1 of the Tenth Census.¹ Since Newfoundland has no regular census or statistics office of its own, the bibliographical material was supplied by the Dominion Bureau of Statistics of Canada.

The Census of 1935 was taken by the Department of Public Health and Welfare, which does not appear to have published any subsequent material on demography or vital statistics. Vital statistics are published annually by the Registrar General's Office.

EARLY CENSUSES

Canada. Department of Agriculture.

Censuses of Canada, 1665 to 1871. Census of Canada, 1871, Vol. IV. Ottawa, I. B. Taylor, 1876. lxxxv, 422 pp. HA 741.1871

The major portion of this volume consists of summaries of censuses taken at different periods in and for the various territories of British North America. The censuses of Newfoundland for 1687, 1691, 1692, 1696, 1698, 1705, 1711, 1845, 1857, and 1769 are included.

Newfoundland. Department of Public Health and Welfare.

Tenth Census of Newfoundland and Labrador, 1935. Vol. 1, Appendix A. St. John's. Printed by the Evening Telegram, Ltd., 1937. HA 747 No. 52.1935a

Appendix A contains a chronological list of the censuses of Newfoundland, compiled by the Census Branch of the Dominion Bureau of Statistics. The number of persons wintering in St. John's is reported for 1613 and 1622. Estimates are reported from secondary sources for 1654, 1671, 1673, and 1680. Censuses of the French population and agriculture are reported for 1687, 1693, and 1694; censuses of the French population only in 1704 and 1706. Various special censuses are reported for Plaisance. A census of English population and agriculture is also reported for 1696. Estimates from various sources are reported for many of the intervening years.

CENSUS OF 1935

Department of Public Health and Welfare.

Tenth Census of Newfoundland and Labrador, 1935. St. John's, N. F., Printed by the Evening Telegram, Ltd., 1937. HA 747.N52 1935

Vol. I. Population by districts and settlements. 961, xxix pp. [Historical information for different years is given for the following topics: Population distribution; religion; sex and age distribution; conjugal condition; birthplace; nationality; literacy; school attendance; defectives; orphans under age of 15 years. Appendix A contains a chronological list of Newfoundland censuses.]

Vol. II. Part I. Families and dwellings, occupations, and earnings, buildings. Part II. Vessels, boats and gear. Occupied land and livestock. 675 pp. [Part I, Section I, Families and dwellings, gives the number of persons per house and per family; number of families and dwellings, monthly rent; and the value of owned dwellings, by districts. There are separate tables for St. John's on families and dwellings, and monthly rent and value of owned dwellings. Section II, Occupations, earnings and buildings, gives, for occupations and earnings, the number in various occupations, 1857-1921; number occupied and per cent of total population, 1857-1935; males and females in selected occupations and earnings reported; classification and class of worker; class of worker and number living on income;

and number reporting earnings by sex and industry groups. The section on buildings gives historical data from 1891 to 1935. Appendix A is a classification of industries]

Part II, Section I, Fisheries, vessels, boats and gear, contains information on the number of people engaged in various parts of the fishing industry. Section II covers occupied land, produce, livestock, and products

CURRENT NATIONAL VITAL STATISTICS

Registrar General's Office.

Annual report of the Registrar General of births, marriages, and deaths, for the year ended December 31, 1938. St. John's, N. F., Robinson and Co., Ltd., printers, 1940

HA 747.N5

This annual publication contains general summary tables on estimated population, natural increase, emigration and immigration, from 1907 to 1938, population and deaths at each age group; denominations, births, marriages and deaths by denominations and by districts. Births are given separately by sex and by district. Stillbirths and illegitimate births are given from 1929 to 1938. Deaths are given by age groups, districts and cause. There is a special section on deaths from tuberculosis, and a section on infant mortality.

COLONIES IN THE CARIBBEAN

Bahamas, Barbados, Bermuda, British Guiana, British Honduras, Falkland Islands, Jamaica and Dependencies, Leeward Islands, Trinidad and Tobago, Windward Islands

Historical

Complete censuses were taken in few of the British colonies and possessions prior to the middle of the nineteenth century, although estimates and local enumerations of various types were made throughout the early period of European occupancy.¹ The decennial censuses which were taken in most of the colonies between 1861 and 1921 followed the general plan of the English census, with supplementary questions added according to local problems and interests. Financial stringency was responsible for the failure to take the 1931 census in many areas, while the difficulties of the war led to the cancelation of the 1941 censuses. There are only two recent censuses, those of Bermuda in 1939, and Jamaica in 1943.

Sparse populations, inadequate transportation and communication systems, ethnic and linguistic diversity, and other factors making the accurate enumeration of the population difficult have also hindered the development of adequate systems for the collection of vital statistics. Birth and death rates for British Guiana refer only to the coastal population, omitting the Indian and Negro inhabitants of the interior. The development of accurate vital statistics in British Honduras has been retarded by the mixed character of the population and the limited resources of the colonial government. The difficulties of inter-island communications have been one of the fundamental problems facing the registration officials of Bermuda. The factors facilitating or retarding the collection of complete and adequate statistics have varied from colony to colony, and from period to period. Hence the evaluation of these British colonial census and vital statistics cannot be made *a priori*, but only on the basis of an appraisal of specific data for the various colonies.²

Formal census publications constitute only a fraction of the materials available for the analysis of population trends and population problems in the British colonies. Publications of the Crown Agents for the Colonies, usually printed in

¹ For references to the literature see Ragatz, Lowell J., Compiler. *A guide for the study of British Caribbean history, 1763-1834, including the abolition and emancipation movements*. Annual report of the American Historical Association, 1930. Vol. III. Washington, Govt. Printing Office, 1932. viii, 725 pp. Z 1502 B5 R221. Also Pitman, Frank W. *The development of the British West Indies, 1700-1763*. New Haven, Yale University Press, 1937. xiv, 495 pp. See especially Appendix I, The population of the British West Indies, and Appendix II, An account of the number of Negroes imported and exported at Jamaica each year, 1702-1775. pp. 391-392.

The early estimates and counts for individual colonies are often summarized in later census reports. For instance, the results of the censuses of 1816 and 1830 and the triennial censuses to 1835 for British Honduras are reproduced as an appendix to the 1921 census. British Honduras. General Registry. Report on the census of 1921. Part I Report. Part II Tables . . . Belize, Govt. Printing Office, 1922. 141 pp.

² Kuczynski's study of colonial statistics led him to the conclusion that knowledge of colonial populations was utterly inadequate. Permanent census staffs exist in hardly any colony, the quality of a census depending primarily on the skill of the official directing the census and the funds put at his disposal. His conclusion is that the problem is not how to improve the existing colonial statistics, but rather, an absolutely new departure based on the actual problems and difficulties of the colonial areas, not on imitation of the census techniques devised for other countries. Kuczynski, Robert R. *Colonial population*. London, Oxford University Press, 1937. 101 pp. Introduction, pp. iv-xiv. HB 885.K8

the chief city of the colony, include not only the census reports, but also the reports of the Registrar-General, and the annual Blue Books. The publications of the Colonial Office of Great Britain include both annual reports on the social and economic progress of the various colonies, and such special studies as those of the Comptroller for Development and Welfare in the West Indies.³ In addition, the reports of recent Royal Commissions have been concerned to greater or less degree with the social and economic aspects of population problems.⁴

Population statistics and studies are included at irregular intervals in other colonial publications. Census reports are sometimes published in the Official Gazettes of the individual colonies, or as supplements to them. Reports on population problems are occasionally included in the Gazettes.⁵ Many reports of legislative councils or investigating committees also include discussions of the acute nature of the problems of overpopulation and possible remedial measures.⁶

The bibliography which follows lists first the general types of statistical sources available for all colonies. Censuses and current vital statistics are then listed separately for each colony. Census reports to which no specific citation is made were not located.

GENERAL SOURCES FOR POPULATION STATISTICS OF BRITISH COLONIES

Colony.

Blue Book. Colony of _____, 19____. Printed in colony. Separately catalogued.

Section 15 of each Blue Book is devoted to population and vital statistics. The form of the tables is standardized, although the amount of information actually presented varies from colony to colony. The tables call for data on the populations of divisions by sex and color, number of persons employed in agriculture, manufacturing and commerce, and the annual numbers of births,

³ Great Britain. Colonial Office. *Development and welfare in the West Indies, 1910-1942*. Report by Sir Frank Stockdale, Comptroller for Development and Welfare in the West Indies. London, H. M. Stationery Office, 1943. 93 pp. Specific recommendations for development and welfare programs in the fields of public health, agriculture, labor, social welfare, and education are made in accordance with the provisions of the Colonial Development and Welfare Act of 1940. The report includes a summary of the background of the Act, as well as a general résumé for each of the individual colonies. Govt. Publ. R. R.

⁴ See, for instance, Great Britain. West India Royal Commission. *West India Royal Commission, 1938-39. Recommendations*. Command 6174. London, H. M. Stationery Office, 1940. 30 pp. F2131 G83. This report is a summary of the recommendations, to serve as a guide to action programs until such time as the report can be published in full. See also, International Labour Office. "A social programme for the British West Indies." *International Labour Review* 41 (5): 517-528. May, 1940. The program recommended here is based on the recommendations of the Royal Commission and the Labour Advisor to the Secretary of State for the Colonies. Extensive land settlement schemes with subsistence agriculture are recommended as the first approach to the solution of the problems of surplus population on estates. See also Great Britain. Colonial Office. *Agriculture in the West Indies*. Colonial No. 182. London, H. M. Stationery Office, 1942.

Another recent outstanding report on the problems of the British West Indies is the following: Orde Brown, G. St. J. *Labour conditions in the West Indies*. Command 6070. London, H. M. Stationery Office, 1939. 216 pp. This report concerns labor conditions in the West Indies, British Guiana, British Honduras, the Bahamas, and Bermuda. The first section consists of a general report dealing with problems common to the majority of the colonies. The second consists of detailed special reports on each colony, including a discussion of the special circumstances of the colony and the possible solutions. Local potentialities for the employment of surplus labor were investigated in all areas.

⁵ Supplement to the Leeward Islands Gazette of Thursday, the 22nd of February 1940, pp. 3-12, is devoted to "Statement by His Majesty's Government on colonial development policy, and including a statement on the recommendations of the West India Royal Commission." *Leeward Islands Gazette for the Year 1940*, Vol. LVIII. J 3 B7.

⁶ Barbados. Legislature. *Minutes of Council and Assembly, 1937-1938*. Report of the Commission appointed to enquire into the disturbances which took place in Barbados on the 27th of July and subsequent days. JI 37.H3.

[Reports of the censuses of 1816, 1820, 1823, 1826, 1829, 1832, 1835, 1861, 1871 and 1881 were not located. See Census of 1921 for reference to summary tables.]

British Honduras.

Results of census, April 6, 1891 Belize, 1891

DC

Report on the results of the census of the colony of British Honduras, taken on the 31st March 1901. Belize, Printed at the "Angelus" Office, 1901 31 pp

Army Medical Library

Report on the result of the census of the colony of British Honduras, taken on the 2nd April 1911. Belize, Printed at the "Angelus" Office, 1912 46 pp

Army Medical Library

British Honduras. General Registry.

Report on the census of 1921 taken on the 24th April, 1921 Belize, Govt. Print. Office, 1922. 2 vol. Part I, Report, Part II Tables 141 pp HA 791 A5 1921

The census history of British Honduras is sketched briefly and summary data from the censuses of 1816, 1820, 1823, 1826, 1829, 1832, 1835, 1861, 1871, and 1881 are included

Census of British Honduras, 1931. Belize, Printed by the Government Printer, 1933. 72 pp. HA 791 A5 1931

Age, sex, religion, birthplace and nationality, literacy, occupation, infirmities, and housing of the population are covered, with age and sex cross-classifications for many of the characteristics. A résumé of population trends from 1861 through 1931 is included.

CURRENT VITAL STATISTICS

British Honduras. General Registry.

Report on the vital statistics of British Honduras for the year 1939 Belize, Government Printer, 1940 27 pp Army Medical Library

Vital statistics are included for 1935-1939, with classifications by sex and race.

British Honduras. Medical Department.

Annual medical and sanitary report for the year ending 31st December, 1941. Belize, Government Printer, 1942 11 pp. RA 191 B7A3

Summary vital statistics are included.

FALKLAND ISLANDS AND DEPENDENCIES

CENSUSES, 1881-1921

Falkland Islands.

Census of the Falkland Islands, 3rd April, 1881 Stanley, 1881 (?) 5 pp HA 1105.F3A5 1881

Falkland Islands. Colonial Secretary. Supervisor of Census.

Report on census, 1901. Stanley, 26th September, 1901. 10 pp HA 1105 F3A5 1901

Comparative data for 1881 and 1891 are included.

Falkland Islands. Registrar General and Supervisor of Census.

Report on census, 1911. Stanley, 1911. 12 pp HA 1105 F3A5 1911

Report on census, 1921. London, Waterlow and Sons, Ltd., 1922 12 pp. HA 869 F3A3 1921

Data are presented on distribution, and composition by sex, age, marital status, occupation and birthplace.

CURRENT VITAL STATISTICS

Falkland Islands.

Vital statistics for the Falkland Islands for the year ended 31st December, 1937.
pp 34-35 in: Falkland Islands Gazette, March 1, 1938 J 3.B45

The estimated population of the islands as of the end of 1937 is given by sex, with a separate estimate, by total only, for South Georgia. Marriages, births and deaths are given for three areas. Migration statistics are included.

Falkland Islands. Medical Department.

Annual medical and sanitary report for the year ended 31st December, 1939. Port Stanley, 1940 RA 237.F3A3

A summary report of vital statistics for 1939 is included.

JAMAICA AND DEPENDENCIES

Cayman Islands, Turks and Caicos Islands, Marant and Pedro Cays

CENSUSES, 1844-1921

Jamaica. Registrar General's Department.

Census of Jamaica and its dependencies taken on the 4th April, 1881. Kingston, Govt. Print. Establishment, 1882 32 pp. HA 891.A4 1881

Comparative data for 1871 are included.

Census of Jamaica and its dependencies taken on the 6th April, 1891. Kingston, Govt. Printing Office, 1892 80 pp. HA 891.A4 1891

Census of Jamaica and its dependencies taken on the 3d April, 1911. Kingston, Govt. Print. Office, 1912. 93 pp. HA 891.A4 1911

Census of Jamaica and its dependencies, taken on the 25th April, 1921 . . .
Kingston, Govt. Print. Office, 1922. 76 pp. HA 891.A4 1921

Population data include color, age, sex, marital status, literacy, occupation, religion, and nationality. Special sub-classifications are given for the Indian population.

Part III
AMERICAN COLONY OF DENMARK

GREENLAND

Historical

The historical censuses and vital statistics of Greenland have been developed as an integral part of the centralized statistical system of Denmark itself. A central statistical institution, the Dansk-Norsk-Tabelkontor, existed between 1797 and 1819. It was succeeded by a commission of members of various governmental departments, the Tabelkommission, which had charge of demographic statistics from 1834 to 1848. A statistical bureau was organized in 1850, although the financial resources were small. It achieved greater independence in 1896 and again in 1913, when it became known as the Statistical Department.¹

In the early period both the taking of the census and the collection of vital statistics were the responsibilities of the clergy. In the census years of 1787 and 1801 the rural clergy enumerated the members of their congregations, while the magistrates had charge of the enumeration in the towns. The process of secularization was advanced in 1834, since, although the clergy supervised the enumeration, the actual collection of information was in charge of the school teachers. A house-to-house canvass replaced the earlier system of enumeration in the churches. Quinquennial censuses were taken between 1840 and 1860. In 1870 the local authorities, including the parish councils and the magistrates, executed the census, but the original name lists were sent to the central bureau for tabulation. Only decennial censuses were taken between 1860 and 1890, but beginning with 1901 and extending through 1940 there have been quinquennial enumerations.

The geographic, economic, and cultural differences between Greenland and Denmark are reflected in the relative completeness and the accuracy of the census statistics for the two areas.² Thirteen censuses have been taken in Greenland under Danish auspices. The first of these was taken during the early years of the nineteenth century, although it is variously cited as having been taken in 1801, 1802, and 1805.³ The results of this census were presumably published with the returns of the census of 1834, in the *Statistisk Tabelværk, ældste Række*, 6 Hæfte. Later censuses were taken in 1840, 1845, 1855, 1860, and then decennially through 1930. A census of Denmark itself was taken in 1940, but it appears probable on the basis of available information that Greenland was not included.

³ Denmark. Statens statistiske bureau. *Resume des principaux faits statistiques du Danemark*, No. 1. Copenhagen, Imprimerie de Bianco Luno, 1874. 81 pp. HA 1479

No. 1-2. Table I, Superficie, population d'après les recensements de 1801, 1840, 1860 et 1870, population calculée au 1^{er} octobre, 1874. Included is a population for Greenland as of 1802. On the other hand, the report of the 1930 census states that this is the thirteenth census of Greenland, and gives data on the population in 1905, without reference to either 1801 or 1802. See Denmark. Statistiske Departement. *Folketællingen i Grønland den 1 oktober 1930*. Population de Groenland au 1^{er} octobre 1930. Statistiske Meddelelser, 4 Række, 87. Bind, 6 Hæfte. København, Bianco Lunos Bogtrykkeri, 1932. 47 pp. HA 1473 B

The population statistics of Greenland have been published in the Danish statistical series. The earliest census located was that of 1880, but references to previous censuses have been taken from the census of 1930⁴. Summaries of census data were published in the *Sammendrag af Statistiske Oplysninger* from 1874 to 1893, and in the *Statistisk Aarbog* since 1896⁵. Current vital statistics also appear in abbreviated form in the *Statistisk Aarbog*.

The report of the 1930 census includes births and deaths for Greenland and each of the four regions, by single years, 1922-1930 inclusive. Distribution by months is given for the period as a whole, as are causes of death in the native population, and deaths by broad age groups. There is a brief summary of historical trends in mortality in Greenland, and comparisons with trends in Denmark itself, pp. 15-24.

Denmark. Statistiske Departement.

Statistisk Aarbog, 1941. København, Bianco Lunos Bogtrykkeri, 1941. xxxii, 307 pp. HA 1477 1941

Table 13, pts. 1-3, p. 230, includes total population figures from census data from 1805 to 1930; population by broad age groups, by sex and marital status in 1930; and marriages, births, and deaths for the years 1932-1938, by major regions.

Part IV

AMERICAN COLONIES OF FRANCE

FRENCH COLONIES

French Guiana, Guadeloupe, Martinique and Dependencies, St. Pierre and Miquelon

Historical

The French colonies in the Americas consist of French Guiana, Guadeloupe, Martinique and Dependencies, and St. Pierre and Miquelon¹. The literature on these colonies is profuse, but exact information concerning the extent and nature of their demographic statistics is quite elusive. The International Statistical Institute reports that there were censuses in Guadeloupe and Dependencies, French Guiana, Martinique, and St. Pierre and Miquelon in 1831, 1845 (except St. Pierre and Miquelon), 1852 (except French Guiana), 1861, 1876, 1906, 1911, 1921-1926 (Martinique, 1927), 1931, and 1936. A census of French Guiana was presumably taken in 1829². The difficulties of locating the original censuses is due in part to the fact that there has been no consistent plan of publication over any considerable period of time. In addition, French official publications tend to present tabular materials with no specific annotations as to source or method of compilation.

Early nineteenth century censuses, or estimates based on them, were published in detail by the *Ministère de la marine*, 1837, and the *Ministère des colonies*, 1842. Both census and vital statistics for the colonies were published in the *Statistiques coloniales*, issued by the *Ministère du commerce, de l'industrie et des colonies*, 1839-91, although issues for 1892-95 to 1898 included only commercial data. For the censuses of 1906 and 1911, special publications on population were issued by the *Ministère des colonies, Office colonial*.³ Current population materials are carried occasionally in abbreviated form in the Bulletin, *Agence générale des colonies*.

The statistical publications of Metropolitan France have tended to contain increasing amount of material on the Colonial Empire. The *Annuaire statistique* carries summary data, and the first volume of each French census presents a résumé of census data for the individual colonies and possessions. Both of these sources present the colonial statistics without reference to the method of enumeration or the probable degree of completeness and accuracy of the returns.

¹ The Territory of Inini was created by a decree of June 6, 1930. For the governmental structure and internal organization of the various colonies, see France, *Ministère des colonies, Annuaire* . . . 1934-1935. "Colonies françaises de l'Amérique," pp. 233-268. Paris, Charles-Lavauzelle et Cie., 1935. 79, 692, 142 pp.

V33 F7 A2

² Institut international de statistique. *Aperçu de la démographie des divers pays du monde, 1929-1936*. La Haye, Office permanent de l'Institut . . . 1939. Table 3, pp. 44-50. HA 42 A65

³ *Ministère des colonies, Office colonial, Statistiques de la population dans les colonies françaises pour l'année 1906, suivies du relevé de la superficie des colonies françaises*. Melun, Imprimerie administrative, 1909. 608 pp. HA 122S.A4 1904

Also, *Ibid.*, 1911. Paris, Bureau de vente des publications coloniales officielles, 1914. 610 pp. A similar publication, issued for the 1921 census, was not located. HA 122S A4 1911

There have been demographic publications by the individual colonies in the Americas, but these appear to have been issued only sporadically and in quite abbreviated form.⁴

The general paucity of published statistics reflects no lack of interest on the part of the French in the population problems and the vital trends in their Colonial Empire. French demographers have studied the available statistics with great care, attempting to infer from them the trends of growth of the native populations. They have also studied the problems involved in securing more adequate colonial vital statistics through the use of hospital records, experimental medical services, and other techniques. The general consensus of opinion among demographers who have made careful studies of the official population and vital statistics in the colonial possessions is that the censuses are so inaccurate and incomplete as to be of little analytical value for areas in most of Africa south of the Sahara, Oceania, and America.

Ulmer states that the censuses are often merely administrative estimates, made according to procedures that varied with the inclination of the administrator and local circumstances.⁵ The dispersion and mobility of the population, the general lack of education, and the suspicion of the inhabitants, especially when a system of per capita taxes exists, makes any accurate count impossible. Ulmer cites the age distributions in the various French colonies as illustrative of the influence of fiscal considerations on demographic returns. In French West Africa the percentage of youth under 15 was returned as 21 percent in Senegal and the Ivory Coast, 23 percent in Guinea, and 37 percent in Dahomey. The explanation is that the age limit for the payment of the per capita tax is 16 in Dahomey, but 8 to 10 in the other colonies.⁶

Only Algeria and Indo-China among the French possessions have organizations whose major function is statistical work. In the majority of the colonies proper, census and other statistics are compiled on the basis of instructions sent out from the *Administration centrale des colonies*, and thus theoretically are uniform. Actually, the local administrators may or may not heed the instructions received. Even if they are convinced of the need of accurate and comprehensive statistics, they are faced by the almost insurmountable difficulties of attempting to secure replies to intricate census questionnaires from uneducated and dispersed natives, in a general atmosphere of suspicion and fear, and without the use of trained personnel.⁷

The difficulties involved in the use of French census statistics are nowhere better illustrated than in R. R. Kuczynski's note on the population of French Guiana and Inini Territory:

The published data are quite contradictory. *Résultats statistiques du recensement général*, Vol. I, Part I, p. 113, gives 28,310 Europeans and Assimilated (including 5,419 convicts), 1,000 Natives. *Bulletin de l'agence générale des colonies*, 1932, pp. 668-9, gives for French Guiana 22,169 (17,944 French; 2,934 Foreigners;

⁷ *Ibid.*

1,240 Liberated Convicts; 51 Relegated) and for Innu Territory 3,511 (983 French; 1,319 Foreigners; 441 Native Tribes; 767 Gold Seekers etc.). Colonies Autonomes, December, 1935, p. 173, gives the same totals, but adds: "These figures do not include the aboriginal Indians of the Interior who have fled from civilization." *Statesman's Year-Book*, 1936, p. 947, says that the figure of 22,169 (the author erroneously believes it to include Innu Territory) is "exclusive of the population of the penal settlement of Maron, of the floating population of miners without any fixed abode, as also of officials, troops, and native tribes. . . . The military force consists of 310 officers and men of the Colonial Infantry . . . In 1931 the penal population consisted of 5,954 men." *South American Handbook*, 1937, p. 367, states "The population, inclusive of natives, is estimated at 25,679." Hubners *Geographisch-statistische Tabellen*, 1936, p. 228, gives as population 25,679 and "with wild natives," 45,679. *Almanach de Gotha*, 1937, p. 1052, gives as population 32,596. We have accepted the latter figure."⁸

Thus the French censuses seem to be primarily estimates of the local population made by the colonial administrators according to various methods in the different local areas. Vital statistics are equally inadequate for the majority of the colonies. The civil registration system is organized in only a small proportion of the territories, and even where it exists, it is often of such recent origin and so limited in scope that the numbers of births and deaths registered are totally inadequate as measures of the levels of fertility and mortality.⁹

CENSUSES AND ESTIMATES

CENSUSES OF FRANCE

Statistique générale de la France.

Résultats généraux du dénombrement de 1876. France. Algérie, Colonies. Paris, Imprimerie nationale, 1878. lxvii, 287 pp. HA 1219. 1876

Ch. III, Renseignements sur la population des colonies et autres possessions françaises, reports the number of persons in the French colonies and possessions on the basis of "the last statistics published by the Ministère de la marine et des colonies", in another section, the data are referred to as "résultats généraux du dénombrement de la population, décembre, 1876." The detailed tables give, for Martinique and Dependencies, French Guiana, and St. Pierre and Miquelon the number of men and women, classified as infants, and single, married, or widowed. A total number is also given for the sedentary and the floating population.

Résultats statistiques du recensement général de la population effectué le 4 mars 1906. Tome I. Première partie. Introduction. Population légale ou de résidence habituelle pour la France entière. Paris, Imprimerie nationale, 1908. 126 pp. HA 1219. 1906

Appendice, Tableau II, gives the area, population, and density of population in the various colonies and protectorates as of the census of 1906. The data are credited to: Statistiques coloniales pour l'année 1906—population.

Succeeding censuses carry similar materials. For the last data available, those from the census of 1936, see: *Résultats statistiques du recensement général de la population effectué le 8 mars 1936*. Tome I Première partie. Population légale ou de résidence habituelle. Appendice: Population des territoires français d'outremer et des pays étrangers. Paris, Imprimerie nationale, 1938. 114 pp.

ANNUAIRE STATISTIQUE, FRANCE

Statistique générale de la France.

Annuaire statistique, 1878-19—.

HA1213 A4

The first issue, that for 1878, devoted a chapter to the colonies and possessions. Data entitled "Dénombrement et mouvement de la population, 1875" are given for the various colonies in the Americas, as well as those scattered throughout the remainder of the world. For a considerable period of time the even-numbered volumes contained a retrospective summary of international statistics, while the odd-numbered volumes contained statistics on the colonies. Since 1927 each

⁸ Kuczynski, Robert R. *Colonial population*. Oxford University Press. 1937. pp 70-71 HB 885 K8

⁹ Office international d'hygiène publique. *Essai de démographie des colonies françaises*. Supplément au Bulletin mensuel, xxx, 2 Feb., 1938. 164 pp. RA 421.03

volume has included both the annual tables for France and the colonies, and a retrospective résumé of the statistics of France and other countries.

COLONIAL REPORTS

Ministère du commerce, de l'industrie et des colonies.

Statistiques coloniales, 1839-1890. Paris, Imprimerie nationale HA 1228 A2
This yearbook included both census and vital statistics from the date of its inception until 1891; issues between 1891 and 1898 included only commercial data. After 1898 separate volumes were issued covering the fields of commerce, finance, mining industry, navigation, population (occasionally on census years), and railroads. The contents of the early issues differed, both as to colonies included and the scope of the data. The last issue, that for 1890, gave for each of the American colonies the population in broad age groups by sex, vital statistics, and the number of immigrants by communes. Estimated year-to-year populations as presented in these yearbooks were secured by adding in the natural increase and the net migratory balance of the population of the previous year.

OTHER

Ministère de la marine.

Notices statistiques sur les colonies françaises Première partie, Notice Préliminaire, Martinique, Guadeloupe et Dépendances. Seconde partie, Bourbon, Guyane Française. Quatrième et dernière partie, Possessions françaises à Madagascar, Îles Saint Pierre et Miquelon. Appendix Paris, Imprimerie Royale, 1837-1840. JV 1825 A6 1837

There is a preliminary notice concerning all the French colonies. The "Notice statistique sur la Martinique" includes a brief history of the colony and chapters on topography, meteorology, population, legislation, finance, industry, commerce, etc. The chapter on population gives population as of Dec. 31, 1835, classified as free whites, free men of color, and slaves. The population is divided into broad age groups, separately by sex and for free and slave groups. There is also a distribution for the arrondissement of Fort Royal and St. Pierre, the cities, and the burghs of the rural areas. Vital statistics are given for 1835. Similar tabulations are presented for Guadeloupe and Dependencies.

The second part gives population and vital statistics similar to those for Guadeloupe for French Guiana for the year 1836, while the fourth part includes population and vital statistics for St. Pierre and Miquelon.

Ministère des colonies.

Tableaux et relevés de population, de cultures, de commerce, de navigation, etc., format pour l'année 1839, la suite des tableaux et relevés insérés dans les notices statistiques sur les colonies françaises. Paris, Imprimerie Royale, 1842. 141 pp. HA 1228 A2

Table 1 includes for each of the American colonies the total population in 1839, a classification into three broad age groups, rural-urban distribution, comparisons of the total with 1838, and the numbers of marriages, births, deaths, and natural increase separately for free and slave population. Similar volumes were issued in 1840 and 1841.

Ministère des colonies. Office colonial.

Statistiques de la population dans les colonies françaises pour l'année 1906 suivies du relevé de la superficie des colonies françaises. Melun, Imprimerie administrative, 1909. 608 pp. HA 1228 A4 1906

There is a summary table giving the 1906 census populations for each of the colonies. Sections on each colony, including the American ones, give more detailed data on sex, age groups, marital status, nationality, occupations, and migrants.

Statistiques de la population dans les colonies françaises pour l'année 1911 suivies du relevé de la superficie des colonies françaises. Paris, Bureau de vente des publications coloniales officielles. 1914. 610 pp. HA 1228.A4 1911

Similar data are presented for the 1911 census.

Recensement de la population des colonies françaises en 1921. Published in 1923. Not located.

CURRENT COLONIAL VITAL STATISTICS

Office international d'hygiène publique.

Essai de démographie des colonies françaises. Par Dr. Cazanove. Supplément au Bulletin mensuel 22 (8), août, 1930. Paris, 1930. 86 pp. RA 421.03

This compilation was based on documents supplied by the *Inspection générale du Service de santé des colonies*. Ch. VI summarizes the statistics for the Atlantic colonies. Dr. Cazanove stresses the fact that the civil authorities function primarily in cities, where the presence of hospitals and doctors artificially increases rates based on place of occurrence. The generally strict regulations requiring burial in official cemeteries, and the desire of the natives to obtain an exoneration of per capita taxes by a death certificate, also operate to increase the completeness of death registration. Births are much less likely to be declared, either because of negligence, or because of the rituals which impose a waiting period before the child can be named.

Essai de démographie des colonies françaises. Travail établi par les Drs. Martial et Beaudiment, d'après les documents de l'Inspection générale du Service de santé des colonies, et communiqué par M. le Dr. Sorel, Médecin général inspecteur délégué de l'Afrique Occidentale Française. Supplément au Bulletin mensuel 30 (2), février, 1938. Paris, 1938. 154 pp. RA 421.03

This is a second report on the analysis of French colonial vital statistics which has been carried on regularly since 1930. It covers the period from 1930 to 1935. The expansion of the civil authority is noted, especially in the cities, although meaningful data for the interior regions are available only in places such as the Cameroons, where mobile medical units have permitted the collection of field data.

There is a special section on the colonial possessions in the Atlantic, pp. 108-127. Between 1931 and 1935 the registered birth rate for Guadeloupe fluctuated between 19.57 and 22.38, the death rate between 11.43 and 15.64. Vital rates are given for the larger divisions and communes. The total birth rates for Martinique were in the low twenties, although the birth rates in the communes of the north and the east coast were 35 or above. Other communes had registered birth rates as low as 12, 13, or 14. The general death rate was about 17, although the communal rates ranged from 4.14 to 25.49. In French Guiana, the birth rate was 20.44, although it ranged from a low of 4.78 in one commune to 39.49 in Saint-Laurent. The general death rate was 24.13, although it ranged from a low of 4.27 in the commune of Kaw to 129.29 in Saint-Laurent. No vital statistics are reported from the Territory of Imini. Numbers of births and deaths are reported from St. Pierre and Miquelon, but no rates were computed.

Part V
AMERICAN COLONIES OF THE
NETHERLANDS

CURAÇAO AND SURINAM

Historical

Statistical data on the Dutch possessions in the Americas have been published for nearly a century in the annual report of the *Departement van koloniën*.¹ From approximately 1850 to 1930 the *Koloniaal verslag* was issued as a one-volume report on the Netherlands colonial empire. Since 1931 it has appeared as three two-part publications, the *Indisch verslag*, dealing with the East Indies, the *Curaçaosch verslag* and the *Surinaamsch verslag*.

Statistics on the population of Surinam have been recorded since the Dutch established a civil government in that country in 1828. Their reliability has varied considerably from one period to another, dependent not only on the administrative organization of the statistical system itself but also on the changing social and ethnic composition of the population actually resident in the colony. The interior jungles are inhabited by Indians and Bush Negroes, the descendants of escaped slaves. These groups have never been counted, although estimates of total numbers have been made annually.

Information on the balance of the population is derived from registers. Prior to 1921 these were maintained by the civil authorities in each populated place, and consisted of annual estimates of the population, each estimate based upon the previous one and computed by means of vital statistics as locally recorded. These local estimates were consolidated and published by the Colonial Office, appearing in its annual report from the first half of the nineteenth century down to 1920. Until 1863 these statistics covered only the Europeans and other groups living in concentrated settlements along the coast. In 1863 slavery was abolished, and indentured Indians and West Indians were imported for plantation labor. The more heterogeneous and fluid character of the population made the problem of securing comprehensive statistics increasingly difficult.

In 1921 there was a special population count which appears to have had some of the characteristics of a general census.² No attempt was made to enumerate the interior Indians or the Bush Negroes. Since 1921, statistics on the population of Surinam have been based on this count. A population register has been maintained for the country as a whole since 1921.

Population data for Curaçao and its dependencies are similar to those for Surinam. Prior to 1930, all statistics were based on consolidations of the returns from the local authorities. The first census of the six islands of the Curaçao region—Aruba, Bonaire, Curaçao, Saba, St. Eustatius, and Dutch St. Martin—

¹ Demographic statistics were also included in various other publications of the Dutch Centraal bureau voor de statistiek. See also Netherlands Departement van Buitenlandse zaken *Handboek of the Netherlands and overseas territories*. The Hague, Govt. Printing Office, 1931. vii, 405 pp. DJ 21 A5 1931.

Benjamins, H. D., and Snelleman, Joh. F., *Directors Encyclopaedie van Nederlandsch West-Indië*, 's-Gravenhage, Martinus Nijhoff, 1914-1917. x, 782 pp. F 2141 E53.

Commissie Nederland-Curaçao, 1634-1934 *Gedenboek Nederland-Curaçao, 1634-1934*, Uitgegeven ter gelegenheid der herdenking van de driehonderdjarige vereeniging van Curaçao met Nederland. Amsterdam, J. H. de Bussy, 1934. 382 pp. F 2409 G35.

Amsterdam Koloniaal instituut *Suriname's sociaal-hygiënische beschouwingen*. Amsterdam, 1927. 590 pp. RC 960 A55, No. 14.

² The results of this count were published in the *Koloniaal Verslag* for 1922 and 1923.

was taken December 31, 1930-January 1, 1931.³ The census population was 10 percent above the population estimate for the previous year. Although this census, together with the population register established in 1929-30, was presumably to be the source of post-censal estimates, the actual estimates for 1931 and later years appear to ignore the census count. A second census was scheduled for 1940, but there is no evidence that it was taken.

POPULATION STATISTICS—HISTORICAL

Departement van koloniën.

Medeelingen betreffende de koloniën. Art 60 der grondwet. Aan den heer voorzitter der Tweede kamer van de Staten-generaal, zitting 1849-1850. 's-Gravenhage, 1850. 1 vol.

This publication contains data for 1848 similar to that published for later years in the Koloniaal verslag. JV 33 N2A4 (folio)

Departement van koloniën.

Koloniaal verslag 's-Gravenhage, 1850-1930. Annual, JV 33 N2A4.

A different edition of the material in the Koloniaal verslag for the years 1849-1854 is bound under the title. Verslag van het beheer en den staat der Nederlandsche bezittingen en koloniën in Oost-en West Indie en ter kust van Guinea over 1849-[1854] . . . Utrecht, Kemink en zoon, 1857-58. JV 33.N2A5

The basic organization of this periodical did not change during nearly a century of publication. It consisted of three parts, the first dealing with Java and adjacent possessions, the second with Surinam, and the third with Curaçao and adjacent possessions. In the earliest volumes the statistics on population were presented with the text on population, at the beginning of each part. A number of appendixes were bound with the text of each part, these consisted of decrees or essays on some aspect of colonial administration. By 1874 the tabular information on population was divorced from the text, and was presented in various appendixes to the principal parts of the report. This publication was replaced in 1931-1932 by three two-volume publications: *Indisch verslag* (covering the Netherlands East Indies), *Curaçaosch verslag* (covering the six island areas of the Curaçao region), and *Surinaamsch verslag*.

The following population statistics are included for Curaçao: Vital statistics for Aruba, Bonaire, Curaçao, Saba, St. Eustatius, and St. Martin, including marriages, births, stillbirths, and deaths, population for each area by place of birth and religion; and in later volumes, occupational distribution, mortality by age, and births by legitimacy status.

The statistics in the Surinam section include the following: Vital statistics for the coastal population; estimates of the size of the Indian and Bush Negro population, vital statistics for the military and civilian personnel associated with the Royal Army Medical Corps, and deaths in Paramaribo by cause. Some issues presented vital statistics only for Europeans, others included data for all groups except the Bush Negroes and Indians. The results of the population count of 1921 were presented in the report for 1922 and 1923.

Immigration and emigration data, with separate information for British Indians and West Indians imported as indentured servants, are available for the entire period of publication.

Centraal Bureau voor de statistiek.

Maandcijfers en andere periodieke opgaven betreffende Nederland en de Koloniën. Nieuwe Volksgrieks No 1, jaar 1898, 's-Gravenhage, 1899. Irregular, occasionally several issues per year. HA 1383 A4

This publication occasionally included vital statistics for Surinam and Paramaribo.

Centraal bureau voor de statistiek.

Jaarcijfers voor Nederlanden . . . Annuaire Statistique pour les Pays-Bas. 's-Gravenhage, 1883-19—.

Prior to 1921, there were sections on Curaçao and Surinam which included demographic statistics. The population of each island of the Curaçao group was given by sex, country of origin, and religion, with regional summaries for ten-year periods. Some data on vital statistics and the occupational composition

³ The *Curaçaosch verslag* containing the original presentation of the result of the census was not located, although data from the census were included in subsequent issues.

of the population were also included. Population data for Surinam were similar including labor force statistics by country of origin, information on industrial servants, population estimates, and vital statistics classified by age, sex and legitimacy.

POPULATION STATISTICS—CURRENT

Departement van Kolonien.

Curçaosch verslag, 1938. I. Tekst van het verslag van bestuur en staat van Curaçao over het jaar 1937 II Statistisch jaaroverzicht van Curaçao over het jaar 1937. 's-Gravenhage, Algemeene Landsdrukkerij, 1938. I, 84 pp II, 383 pp. J 154 R15

Vol. I. contains the population estimates of each island as of the end of the year. Vol. II. contains the detailed reports of the Census Office and the Civil Register.

Surinaamsch verslag, 1938. I Tekst van het verslag van bestuur en staat van Surinam over het jaar, 1937 II Statistisch jaaroverzicht over het jaar 1937. 's-Gravenhage, Algemeene Landsdrukking, 1939 I., 86 pp. II., 198 pp J 155 R15

Contents and general arrangement are similar to those of the *Curçaosch verslag*.

Part VI

**AMERICAN TERRITORIES AND
POSSESSIONS OF THE
UNITED STATES**

ALASKA

Historical

The earliest recorded count of any Alaskan natives was made by an agent of a Russian fur company, in 1792, and covered the villages on Kodiak Island and one or two settlements on the mainland. Subsequent counts of parts of the Russian colonies were taken by government officials in 1812, 1818, or 1819, 1822, and 1825. The most accurate counts or estimates are considered to be those of the priest Veniaminoff. These include a statement of population fluctuations between 1781 and 1830 in the districts of Kodiak and the Aleutian Islands, a census of the Aleutians in 1831, and an estimate of the total population of Alaska in 1839, which was published in full in the Alaskan volume of the Tenth Census of the United States¹. In 1860 the Russian Holy Synod issued a report on Christians in Russian America, based on information furnished by priests and missionaries. Several reports by government officials were issued through 1863, but these appear to be quite inaccurate. A more detailed account of Russian data may be found in the Introduction to the Alaskan volume of the Eleventh Census of the United States².

The first official United States report after the acquisition of Alaska in 1867 was contained in Major General Halleck's report to the United States army. Information first appeared in the United States Census in a special report in the Tenth Census, which included population, a review of the fur trade, fisheries, minerals and agriculture, geography and topography, a historical sketch, and notes on Alaskan ethnology. The Eleventh Census also included a special volume on Alaska. The results for both 1880 and 1890 were based only partially on actual enumeration, since information that could not be secured directly was estimated on the basis of records and personal knowledge of missionary priests. Succeeding censuses have become increasingly more complete and accurate. The unusual climatic conditions, the scattered population, and the difficulties of communication make a spring enumeration practically impossible. Hence the last two censuses have been taken as of October 1 of the year preceding the official census date for the United States³.

Vital statistics are collected by the Registrar of Vital Statistics and are published biennially in the Report of the Auditor of Alaska. Yearly totals of births, deaths, marriages, and adoptions are included in the annual report of the governor.

Territory of Alaska. Population. Composition and characteristics.

Population, Characteristics of the population (with limited data on housing). Washington, Govt. Printing Office, 1943 iv, 20 pp

Presents data on sex, age, race, linguistic stock, nativity, place of birth, citizenship, marital status, occupation, and industry, and for occupied dwelling units by tenure, number of rooms, and value or monthly rent

CURRENT VITAL STATISTICS

Alaska [Ter.]. Office of Auditor.

Report of the Auditor of the Territory of Alaska, 1939-40. Juneau, Alaska, 1941. 32 pp HJ 11.A423

The Auditor's Office includes the Registrar of Vital Statistics for the Territory. The section on vital statistics in this biennial report includes a discussion of delayed registration of births, and statistics on births, deaths, cause of deaths, marriages, and adoptions for 1939 and 1940, by divisions.

Alaska [Ter.]. Governor.

Annual report of the Governor of Alaska to the Secretary of the Interior. Fiscal year ended June 30, 1942 Washington, Govt. Printing Office, 1942 35 pp. J 87 A41

The section by the Auditor of Alaska contains total figures for births, deaths, marriages, and adoptions.

PANAMA CANAL ZONE

Historical

There is no accurate population information for the Panama Canal Zone prior to its acquisition by the United States in 1903. The Republic of Panama did not take its first national census until 1911 although the country was included in the Colombian census of 1870.

The first United States census of the Canal Zone was taken on February 1, 1912, by the Department of Civil Administration of the Isthmian Canal Commission. The Canal Zone was included in the regular decennial censuses of 1920, 1930, and 1940, the count being taken under the supervision of the governor. A house-to-house count of the civil population was taken by the police force after the Census of 1940. The results are presented in the Annual report of the Governor of the Panama Canal, 1941.¹

Vital statistics are published annually in the report of the Health Department, and a brief summary is given in the annual report of the Governor. These reports include the cities of Panama and Colon, over which the United States has jurisdiction in matters relating to sanitation and public health.

Summaries of vital statistics and information on immigration are included.

PUERTO RICO

Historical

The Spanish government took censuses of Puerto Rico in 1765, 1775, 1800, 1815, 1832, 1846, and 1857, but the original reports of these censuses were not located. Data on the population of towns from the censuses of 1846 and 1857 are reproduced in a *Memoria* of the *Comisión de estadística especial*¹. The data for 1857 were evidently considered to be quite unreliable, since they were not included in the published reports of the Spanish census for that year. The censuses of 1860, 1877, and 1887 were included in the regular Spanish census volumes. The last Spanish census of the island was taken in 1897, but the data were only partially tabulated. A total population figure from this census is given in Bulletin No. 1 of the Census of 1899².

The census of 1899, the first United States census of the island, included population and agriculture. Since 1910 the census of Puerto Rico has been included in the regular decennial census of the United States. A special census, taken by the Puerto Rico Reconstruction Administration in 1935, included only population and agriculture.

Vital statistics are published by the Health Department at San Juan, in monthly bulletins and in an annual report. Puerto Rico was admitted to the death-registration area in 1932. Annual figures on deaths by age, race, and cause are included in the supplement to the vital statistics reports of the United States.

VIRGIN ISLANDS OF THE UNITED STATES

Historical

Censuses of the Virgin Islands were taken at approximately 5-year intervals from 1835 to 1860, and then at approximately 10-year intervals until 1911. Those located, from 1855 on, were published in the Statistiske Meddelelser of Denmark. The census of 1850 was published as part of the Statistisk Tabelvaerk; it is probable that the three earlier censuses appeared in the same series. Total population figures from the census of 1835 are available in the Folkemaengden, 1 Februar 1901 i Kongeriget Danmark.¹ Data for 1835, 1841, and 1846 are reproduced in the census of 1855.

The United States took a special census in 1917, including population, agriculture, manufactures, and fisheries. The islands first appeared in the regular decennial census in 1930.

The three islands comprising the Virgin Islands—St. Croix, St. Thomas, and St. John—were admitted to the birth- and death-registration areas in 1924. Vital statistics are collected by the Department of Health of St. Thomas and are included annually in vital statistics publications of the United States.
